May 2007

INTRODUCTION

The Manufactured Food Regulatory Program Standards (program standards) establish a uniform foundation for the design and management of State programs¹ responsible for the regulation of food plants. The elements of the program standards describe best practices of a high-quality regulatory program. Achieving conformance with them will require comprehensive self-assessment on the part of a State program and will encourage continuous improvement and innovation.

The program standards are comprised of ten standards that establish requirements for the critical elements of a regulatory program designed to protect the public from foodborne illness and injury. These elements include the program's regulatory foundation, staff training, inspection, quality assurance, food defense preparedness and response, foodborne illness and incident investigation, enforcement, education and outreach, resource management, laboratory resources, and program assessment. Each standard has corresponding self-assessment worksheets and certain standards have supplemental worksheets and forms for determining a level of conformance with such standards. The State program is not required to use the forms and worksheets contained herein; however, alternate forms should be comparable to the forms and worksheets for program standards. These program standards do not address the performance appraisal processes that a State agency may use to evaluate individual employee performance.

FDA will use the program standards as a tool to improve contracts with States. The program standards will assist both FDA and the States in fulfilling their regulatory obligations. The implementation of the program standards will be negotiated as an option for payment under the State contract. States that are awarded this option will be expected to implement the program standards to evaluate and improve their manufactured food program. FDA recognizes that full use and implementation of the program standards by those States will take several years. Such States will, however, be expected to implement improvement plans to demonstrate that they are moving toward full implementation.

The goal is to implement a risk-based food safety program by establishing a uniform basis for measuring and improving the performance of manufactured food regulatory programs in the United States. The development and implementation of these program standards will help Federal and State programs better direct their regulatory activities at reducing foodborne illness hazards in food plants. Consequently, the safety and security of the United States food supply will improve.

The collection of information has been approved by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 and has been assigned OMB control number 0910-0601.

BACKGROUND

The food safety regulatory system in the United States is a tiered system that involves Federal, State, and local governments. The Food and Drug Administration (FDA) is responsible for ensuring that all foods moving in interstate commerce, except those under United States Department of Agriculture jurisdiction, are safe, wholesome, and labeled properly. State agencies conduct inspection and regulatory activities that help ensure that safe food is produced, processed, or sold within their jurisdictions. Many State agencies also conduct food plant inspections under contract with the FDA. These inspections are performed under the States' laws and authorities or the provisions of the Federal Food, Drug, and Cosmetic Act (FD&C Act) or both. To maximize

¹ Program defined as an operational unit(s) that is responsible for the regulatory oversight of food plants.

the use of resources among the FDA and the State governments, particularly when their jurisdictions overlap, their inspection programs should be equivalent in effect.

In June 2000, the Department of Health and Human Services' Office of the Inspector General (OIG) released a report of FDA's oversight of State contracts. In this report, the OIG recommended that [FDA] take steps to promote "equivalency among Federal and State food safety standards, inspection programs, and enforcement practices."² In response to their findings, FDA established a committee to develop a set of quality standards for manufactured food regulatory programs. The committee was comprised of officials from FDA and from State agencies responsible for the regulation and inspection of food plants³.

² Office of Inspector General, *FDA Oversight of State Food Firm Inspections: OEI-01-98-00400* (Department of Health and Human Services, 2000), p. 5.

³ A building or facility or parts thereof, used for or in connection with the manufacturing, packaging, labeling, or holding of human food as defined by 21 CFR Part 110.3 (k) .

Appendix 10	Self-Assessment Worksheet -- Standard No. 10.....	97

⁴ Laws, regulations, rules, ordinances, or other regulatory requirements that govern the operation of a food plant or manufacturing establishment.

- a. The State program has the legal authority to inspect food plants, gather evidence, collect and analyze samples, and take enforcement actions for adulteration or misbranding of foods equivalent in effect to sections of the FD&C Act specified in appendix 1.
- b. The State program enforces regulatory provisions equivalent in effect to the corresponding Federal regulations specified in appendix 1. In the absence of a corresponding law or regulation, the State program will explain how equivalent regulatory authority is met in appendix 1.
- c. The State program uses its laws and regulations to broaden its scope of regulatory authority.

1.4 Outcome

The State program has the legal authority and regulatory provisions to protect the public health by ensuring the safety and security of the food supply.

1.5 Documentation

The State program maintains the records listed here.

- Appendix 1 Self-assessment worksheet
- The statutes, regulations, rules, ordinances, and other prevailing regulatory requirements that: (1) apply to the operation of food plants, (2) delegate authority to the State agency, and (3) stipulate the process by which the State agency establishes its authority, for example, the administrative rulemaking process

STANDARD No. 2 Training Program

2.1 Purpose

This standard defines the essential elements of a training program for inspectors.

2.2 Requirement Summary

The State program has a training plan that ensures all inspectors receive training required to adequately perform their work assignments. The plan provides for basic and advanced food inspection training as well as continued training for professional development in the field of food processing.

2.3 Program Elements

The State program maintains a history of the training provided to all inspectors. Appendix 2.1 may be used to document all training provided to inspectors. Or, the training history may be recorded and retained electronically.

The State program provides, or otherwise makes available, inspection training for all inspectors. A training record similar to appendix 2.2 is maintained.

a. Basic Food Inspection Training

The State program requires that each inspector complete a basic food inspection training curriculum that consists of coursework and field training described here.

Coursework

The State program requires each inspector to complete coursework in the following areas within 24 months of his or her start date with the State program.

- Prevailing statutes, regulations, and ordinances
- Public health principles
- Food defense awareness training
- Communications skills
- Microbiology
- Epidemiology
- Basics of HACCP
- Basic labeling
- Control of allergens

Coursework is obtained from sources listed here.

- In-house training provided by a government agency
- Distance learning, for example, satellite downlinks or web-based training⁵
- Colleges, schools, and research centers

Field training

The State program requires that each inspector participate in a minimum of ten joint inspections with a qualified trainer and receive a minimum of two acceptable evaluations from the trainer. Joint inspections are conducted in firms that are representative of the food plants in the State program's establishment inventory. Each inspector will complete the minimum field training requirements within 18 months of his or her start date with the State program and prior to conducting independent inspections.

b. Advanced Food Inspection Training

The State program requires each inspector who will conduct specialized food inspections to complete an advanced inspection training curriculum that consists of relevant coursework and field training as described here.

Coursework

The State program requires each inspector who will perform specialized food inspections to complete coursework listed here for such inspections.

- Applications of epidemiology & foodborne illness investigations
- Traceback investigations
- Nutrition labeling
- Acidified foods
- Low acid canned foods
- Principles of juice HACCP
- Principles of seafood HACCP

Field training

The State program requires that each inspector who will conduct specialized food inspections participate in three joint inspections with a qualified trainer and receive a minimum of two acceptable evaluations from the trainer. The joint inspections are conducted in food plants representative of the specialty area. The inspector will complete the minimum field training requirements prior to performing independent inspections.

c. Continuing education

The State program requires that each inspector participate in continuing education that includes coursework and inspections. Every 36-month interval, each inspector is required to receive 36 contact hours of classroom training and participate in at least two joint inspections with a qualified trainer. These joint inspections are

⁵ FDA/ORU classroom and long distance learning courses are listed at: http://www.fda.gov/ora/training/course_ora.html

intended to assist the inspector with applying what was learned in the classroom to what should be covered during an inspection.

[Note: The 36-month continuing education interval starts when the basic training cycle is complete -- 24 months after the employee's start date.]

One contact hour is earned for each hour of participation in the continuing education activities from sources described in Section 2.3a.

2.4 Outcome

The State program has trained inspectors with the knowledge, skills, and abilities to competently inspect food plants.

2.5 Documentation

The State program maintains the records listed here.

- Appendix 2.1 Self-assessment worksheet
- Appendix 2.2 Individual training record
- Documents verifying successful completion of required courses
- Course description, if necessary
- Field training and evaluations
- Continuing education certificates

STANDARD No. 3

Inspection Program

3.1 Purpose

This standard describes the elements of an effective inspection program for food plants.

3.2 Requirement Summary

The State program has an inspection system. This system provides the foundation for inspection of food plants to determine compliance with the laws administered by Federal, State, and local governments. In addition, the State program has: (1) an established recall system, (2) a system to respond appropriately to consumer complaints, (3) a system to resolve industry complaints about inspections, and (4) a recordkeeping system for all elements of the inspection program.

3.3 Program Elements

a. Risk-based inspection program

The State program maintains an accurate inventory of its food plants. The inventory is categorized by the degree of risk associated with the likelihood that a food safety or defense incident will occur. Inspections are prioritized, frequencies assigned, and resources allocated based on risk categories assigned to a food plant or product, the manufacturing processes, and the inspection history of the food plant. Appendix 3.2 contains examples of factors that may be considered in defining risk categories.

b. Inspection protocol

The State program has written policies and procedures for inspecting food plants that require the inspectors to:

1. Review the previous inspection report and consumer complaints
2. Have appropriate equipment⁶ and forms needed to conduct inspections
3. Establish [FDA] jurisdiction
4. Select an appropriate product for the inspection and, if necessary, make appropriate adjustments based on what the plant is producing
5. Assess employee activities critical to the safe and sanitary production and storage of food
6. Properly evaluate the likelihood that conditions, practices, components, and/or labeling could cause the product to be adulterated or misbranded
7. Recognize significant violative conditions or practices if present and record findings consistent with State program procedures
8. Distinguish between significant and insignificant observations, and isolated incidents versus trends
9. Review and evaluate the appropriate records and procedures for the establishment's operation and effectively apply the information obtained from this review [during the inspection]
10. Collect adequate evidence and documentation to support inspection observations in accordance with State program procedures
11. Verify correction of deficiencies identified during the previous inspection
12. Behave professionally and demonstrate proper sanitary practices during the inspection

⁶ Standard number 8, appendix 8.3 Inspection Equipment

As appropriate for seafood and juice processors subject to HACCP regulations:

13. Use the *Fish and Fishery Products Hazards and Controls Guide* or the *Juice HACCP Hazards and Controls Guide*, when and as appropriate, to identify and evaluate the hazards associated with the product and process
 14. Assess the firm's implementation of sanitation monitoring for the applicable eight key areas of sanitation
 15. Review the firm's HACCP plan (or necessary process controls in the absence of a HACCP plan) and applicable monitoring verification and corrective action records, including those related to sanitation
 16. Recognize deficiencies in the firm's monitoring and sanitation procedures through in-plant observations
17. Make appropriate introductions, and explain the purpose and scope of the inspection
 18. Use suitable interviewing techniques
 19. Explain findings clearly and adequately throughout the inspection
 20. Alert the firm's person in charge when an immediate corrective action is necessary
 21. Answer questions and provide information in an appropriate manner
 22. Write findings accurately, clearly, and concisely on the State document and provide a copy to the firm's person in charge

c. Food recalls

The State program has a food recall system.

The State program has written recall procedures for:

1. Sharing information about recalls with affected government agencies
2. Promptly removing recalled food products from the market
3. Performing recall audit checks
4. Identifying and maintaining records about essential recall information

d. Consumer complaints

The State program has a system for handling consumer complaints. The system contains written procedures for receiving, tracking, evaluating, answering, closing, and maintaining records of consumer complaints.

e. Food industry inspection complaints

The State program has a system to resolve industry complaints about inspections. The system contains written procedures for receiving, evaluating, answering, and maintaining records of industry complaints about inspections.

3.4 Outcome

The State program has an inspection program that reduces the occurrence of foodborne illness, injury, or allergic reaction by:

1. Focusing inspection resources on high risk plants, products, and processes
2. Obtaining immediate corrections and long-term improvements by manufactured food processors
3. Responding efficiently to prevent unsafe products from reaching consumers or to remove unsafe food from the human food system

3.5 Documentation

The State program maintains the records listed here.

- Appendix 3.1 Self-assessment worksheet
- An official establishment inventory of food plants
- Written procedures and rationale used for grouping establishments based on food safety risk, including the inspection frequency assigned to each defined risk-based establishment category
- Inspection policies and procedures including guidelines for performing inspections that require immediate corrective action and re-inspection
- Written procedures for food recalls, consumer complaints, and industry complaints about inspections
- Records for the three previous years, including inspection reports and reports pertaining to food recalls and follow-up activities, consumer complaints, and industry complaints about inspections

STANDARD No. 4

Inspection Audit Program

4.1 Purpose

This standard describes the basic quality assurance reviews necessary to: (1) evaluate the effectiveness of the inspection program, (2) recognize trends in inspectional coverage, and (3) identify best practices used to achieve quality inspections and sample collections.

4.2 Requirement Summary

The State program conducts quality assurance reviews to assess the effectiveness of its inspections and sample collections. The data used to determine such performance is obtained from observing an inspector conducting an inspection and the inspector's written reports. This standard is not intended, however, to evaluate individual performance.

4.3 Program Elements

The State program implements a quality assurance program (QAP) that identifies elements of its inspection and sample collection processes that need improvement. The QAP has two components: (1) a field audit component, which is an on-site performance evaluation of inspections and (2) a desk audit component, which is a performance review of the written reports of inspections and sample collections. Worksheets 4.2, 4.3, and 4.4 will be used to: (1) calculate an overall audit rating for each review (field inspection performance and written reports of inspections and samples collections) and (2) evaluate ratings for a single performance factor. Managers use the ratings to identify specific aspects of its inspection program that need improvement. Performance ratings that fall below 80 percent indicate a need for improvement and require corrective action.

The State program compiles and summarizes the results of the field and desk audits annually and determines an overall performance rating, which is reported on the self-assessment worksheet (appendix 4.1). The results of the audits are evaluated every 36 months to: (1) determine the effectiveness of the food inspection program, (2) recognize trends in inspectional coverage, and (3) identify best practices used to achieve quality inspections and sample collections.

The worksheets in appendices 4.1-4.8 are used to record and summarize audit findings. Or, the State program may use comparable worksheets to record audit findings.

a. Field Inspection Audit

Supervisory inspector, senior inspector, or team leader conducts field inspection audits to verify that inspections are consistently performed according to the established policies and procedures. The quality of each inspection is audited using the performance factors identified on appendix 4.5. An overall rating for field inspection performance is calculated using worksheet 4.2.

Frequency The QAP requires a minimum of two field inspection audits of each inspector be conducted every 36 months. Inspections selected for audit should include high-risk food firms such as seafood facilities, juice processors, and low-acid canned food operations.

Performance Documentation Appendices 4.5 and 4.2 (including worksheet 4.2)

Performance Factors Inspection procedures and policies described in standard number 3 and appendix 4.5

b. Inspection Report Audit

The QAP requires periodic review of inspection reports to verify that inspectional findings are obtained and reported according to established procedures and policies. The quality of each inspection report is audited using the performance factors listed in appendix 4.6. An overall inspection report rating is calculated using worksheet 4.3.

Frequency The State program determines the number of reports for review based on its inventory of food plants and the number of inspections completed in the past 12 months. At least 75 reports are randomly selected across inspectors and supervisors, and geographical locations. If less than 75 inspections were conducted, all inspection reports will be reviewed.

Performance Documentation Appendices 4.6 and 4.3 (including worksheet 4.3)

Performance Factors Performance factors listed on appendix 4.6, and policies and procedures established by the State program.

c. Sample Report Audit

The QAP requires periodic review of sample reports to verify that samples were properly collected, identified, and submitted according to established procedures and policies and that appropriate information was recorded. The quality of each sample report is audited using the performance factors listed in appendix 4.7. An overall sample report rating is calculated using worksheet 4.4.

Frequency	The State program determines the number of reports for review based on the number of samples collected in the past 12 months. At least 75 reports are randomly selected across inspectors and supervisors, and according to sample type, for example, microbiology, aflatoxin, or low-acid canned foods. If less than 75 samples were collected, all reports will be reviewed.
Performance Documentation	Appendices 4.7 and 4.4 (including worksheet 4.4)
Performance Factors	Performance factors listed in appendix 4.7, and policies and procedures established by the State program.

d. Corrective Action Plan

A corrective action plan is required when an overall audit rating or the rating for an individual performance factor falls below 80 percent. Appendix 4.8 is used to document how the deficiency was corrected.

4.4 Outcome

The State program systematically evaluates and improves its inspection and sample collection systems to ensure that activities and information are accurate, complete, and comply with the jurisdiction's procedures and policies.

4.5 Documentation

The State program maintains the records listed here.

- Written procedures that describe the quality assurance program
- Appendix 4.1 Self-assessment worksheet
- Appendix 4.2 Summary of field inspection audit findings (includes worksheet 4.2)
- Appendix 4.3 Summary of inspection report audit findings (includes worksheet 4.3)

- Appendix 4.4 Summary of sample report audit findings (includes worksheet 4.4)
- Appendix 4.5 Contract Audit - FDA Form 3610
- Appendix 4.5a Guidance for completing contract audit form
- Appendix 4.6 Inspection report audit form
- Appendix 4.7 Sample report audit form
- Appendix 4.8 Corrective action plan (includes table 4.8)

STANDARD No. 5
Food-related Illness and Outbreaks
And
Food Defense Preparedness and Response

5.1 Purpose

This standard applies to the surveillance, investigation, response, and subsequent review of alleged food-related incidents and emergencies, either unintentional or deliberate that may result in illness, injury, and outbreaks. It also applies to the collection, analysis, and dissemination of information that may prevent their recurrence.

5.2 Requirement Summary

The State program establishes systems to:

- a. Use epidemiological information supplied by local, State, or Federal agencies to detect incidents or outbreaks of foodborne illness or injury
- b. Investigate reports of illness, injury, and suspected outbreaks
- c. Correlate and analyze data
- d. Disseminate public information
- e. Distribute outbreak reports and surveillance summaries to relevant agencies
- f. Disseminate current guidance to industry on food defense
- g. Provide guidance for immediate notification of law enforcement agencies when intentional food contamination or terrorism is suspected or threatened
- h. Collaborate as necessary with FDA and other Federal authorities under conditions of increased threat of intentional contamination

5.3 Program Elements

A State program complies with this standard either by performing all of the required elements or by contracting (or signing a memorandum of understanding) with another State agency to perform, coordinate, and/or communicate foodborne illness support activities.

If a State program contracts for support of foodborne illness or injury investigations, it will:

- a. Develop and coordinate the operation of written support service agreements between the food program and the epidemiology support program.
- b. Ensure the support service contract or agreement identifies and describes the roles, duties, and responsibilities of each program for: (1) receiving reports of foodborne illness or injury, (2) performing investigational activities to identify the source of the problem, (3) reporting and recording the results of the investigations, (4) containing or mitigating the incident, and (5) preventing recurrence.

Whether foodborne illness support activities are performed by the State program or under a contractual agreement, it must have [or contract for] a system to:

- a. Conduct illness or injury investigations and collect information using established epidemiology procedures similar to those found in the “*International Association for Food Protection Procedures to Investigate a Foodborne Illnesses, Fifth Edition*”
- b. Provide laboratory support⁷ for investigations of illness, injury, or outbreaks
- c. Maintain a current list of relevant agencies and emergency contacts
- d. Coordinate the traceback and trace-forward of food implicated in an illness, injury, or outbreak
- e. Identify contributing factors for reports of illness, injury, or incidents implicating food
- f. Maintain investigational findings
- g. Distribute the final report of illness or injury implicating food to relevant agencies, e.g. the State epidemiologist and Centers for Disease Control
- h. Immediately notify all relevant agencies if intentional contamination is suspected or threatened, e.g. tampering or terrorism
- i. Establish criteria for releasing information to the public (includes identifying a media person and developing guidelines for coordinating media information with other jurisdictions)
- j. Mitigate and contain food-related illness and injury using enforcement activities and public awareness programs
- k. Provide guidance to prevent or reduce the incidence of food-related illness, injury, and intentional contamination, e.g. tampering or terrorism
- l. Collaborate as necessary with FDA and other Federal authorities under conditions of increased threat or intentional contamination

5.4 Outcome

The State program has a system for surveillance, investigation, response, documentation, analysis, and communication of alleged food-related illnesses, injuries, and unintentional or deliberate food contamination.

5.5 Documentation

The program maintains the records listed here.

- Appendix 5.1 Self-assessment worksheet
- A written description of epidemiology support available or an agreement⁸ that outlines epidemiology support
- A complaint log or database
- Current emergency contact list for communicating with all relevant agencies
- Procedure and contact person for releasing information to the public
- Documented timeframes for responding to complaints
- The illness, injury, or outbreak response procedures and the data collection forms
- Policies and procedures for handling incidents and threats of deliberate contamination and for collaborations with FDA and other Federal authorities under conditions of increased threat or intentional contamination

⁷ Specific requirements for laboratory support are contained in standard number 10.

⁸ Appendix 5.2 is an example of an agreement for epidemiology support between a State department of agriculture and the State health department.

- Written agreements that identify and describe sources of supplemental laboratory capacity and expertise including laboratory support⁹ to detect contaminants not normally found in food
- Investigation reports and summaries

⁹ Standard number 10 describes the elements of laboratory support for a manufactured food regulatory program.

STANDARD No. 6 Compliance and Enforcement Program

6.1 Purpose

This standard describes the State agency's strategies, procedures, and actions to enforce the laws and regulations to achieve compliance and to evaluate the effectiveness of its compliance and enforcement program.

6.2 Requirement Summary

The State program has a compliance and enforcement program, which describes its compliance strategy and procedures. It also audits its conformance to established compliance procedures and identifies areas that need improvement and may require procedural changes.

6.3 Program Elements

The State program has a compliance and enforcement program that: (1) contains enforcement strategies, (2) tracks critical and chronic violations and violators, (3) uses a risk-based system to determine when a directed investigation, follow-up, or re-inspection is needed, (4) establishes a timeline for progressive actions, and (5) has a system to communicate verbal and written policy and guidance to managerial and non-managerial staff. Appendix 6.1 is used to describe the compliance and enforcement program.

The State program conducts a performance review of enforcement actions. A summary of enforcement actions¹⁰ is compiled and an overall rating is calculated using worksheet 6.2. Performance ratings that fall below 80 percent indicate a need for improvement and require corrective action.

Frequency

The audit is conducted every 12 months. The results of the audit will be included in the 36 month overall assessment of the State program's performance vis-à-vis the program standards.

¹⁰

1

Actions in the enforcement strategy may include, but are not limited to:

- Preventive actions such as promoting voluntary compliance through education program and consultation;
- Field actions such as verbal warnings, documented warnings, re-inspections, and product embargos;
- Supervisory/management actions such as warning letters or informal hearings;
- Administrative actions such as complaints and evidentiary hearings to suspend or revoke a business license; and
- Civil or criminal sanctions.

Performance Documentation

Appendix 6.2 (including worksheet 6.2) or equivalent form.

Performance Factors

Performance factors listed in appendix 6.1 and policies and procedures established by the State program.

6.4 Outcome

The State program has a compliance and enforcement program that provides procedures to ensure that compliance actions are supported by sound judgment, adequate evidence, and appropriate documentation that is submitted in program-prescribed formats and timeframes.

6.5 Documentation

The State program maintains the records listed here.

- Appendix 6.1 Self-assessment worksheet
- Appendix 6.2 Summary of compliance and enforcement activities (includes worksheet 6.2)
- Applicable laws, regulations, and guidance documents referenced in standard number 1
- Written procedures that describe the compliance and enforcement program
- Written enforcement strategy and/or procedures

STANDARD No. 7

Industry and Community Relations

7.1 Purpose

This standard describes the elements of industry and community outreach activities developed and accomplished by the State program.

7.2 Requirement Summary

The State program participates in activities that foster communication and information exchange among the regulators, industry, academia, and consumer representatives.

The State program coordinates or participates in outreach activities that provide educational information on food safety and defense issues.

7.3 Program Elements

The State program interacts with industry and consumers by sponsoring or actively participating in meetings such as task forces, advisory boards, or advisory committees. Topics at such outreach efforts may include food defense, investigation strategies, and regulatory requirements. Representatives from affected food industries, consumers, academia, and other Federal, State, and local food protection agencies are invited to these meetings.

Outreach efforts are tailored to a target population and may include dissemination of information using electronic sources and traditional methods such as mailings.

7.4 Outcome

The State program uses outreach activities to inform varied populations about food-related issues.

7.5 Documentation

The State program maintains the records listed here.

- Appendix 7 Self-assessment worksheet
- Meeting summaries, agendas, or other records documenting interaction with food industries and consumers

STANDARD No. 8

Program Resources

8.1 Purpose

This standard describes the elements for assessing the adequacy of the resources (staff, equipment, and funding) needed to support a manufactured food regulatory program.

8.2 Requirement Summary

Staff, equipment, and funding are managed to accomplish the elements detailed in these standards.

8.3 Program Elements

Staffing

a. General Administration and Management

The State program has adequate staff to provide the direction, support, and oversight needed to achieve conformance with the program standards. These activities include program management and direction, general administration, clerical support, office services, and coordination with laboratories.

b. Training Program (standard number 2)

The State program has adequate staff to coordinate a training curriculum and ensure it is properly delivered and tracked.

c. Inspection Program (standard number 3)

The State program has adequate staff to inspect all food plants in its establishment inventory at an adequate frequency that is based on the plant's risk classification and the necessary inspection and travel time. Appendix 8.2 provides formulas for calculating an adequate number of inspection staff.

d. Inspection Audit Program (standard number 4)

The State program has adequate staff to administer and monitor its inspection quality assurance program.

e. Food-related Illness and Outbreaks and Food Defense Preparedness and Response (standard number 5)

The State program has adequate staff to prepare for and respond to emergency situations.

f. Compliance and Enforcement Program (standard number 6)

The State program has adequate staff to implement compliance and enforcement strategies.

g. Industry and Community Relations (standard number 7)

The State program has adequate staff to participate in outreach and education activities.

h. Program Assessment (standard number 9)

The State program has adequate staff to conduct self-assessments of the manufactured food regulatory program.

Equipment

a. Program administration and recordkeeping

The State program has computers, software, and equipment necessary to maintain and secure records.

b. Communication systems and equipment

The State program has equipment needed for routine and emergency communications.

c. Inspections

The State program provides inspectors with equipment needed to conduct quality inspections. Appendix 8.3 is a list of inspection equipment.

Program funding

The State program is adequately funded to cover the following expenses:

- a. Salary and benefits
- b. Training costs
- c. Travel-related expenses
- d. Equipment and supplies
- e. Industry and community outreach expenses
- f. Laboratory expenses
- g. Legal services fees
- h. Indirect costs
- i. Overhead costs

8.4 Outcome

The State program has the resources needed to support a manufactured food regulatory program.

8.5 Documentation

The State program maintains the records listed here.

- Appendix 8.1 Self-assessment worksheet
- Document showing the calculations used to determine an adequate number of inspectors such as appendix 8.2
- Inventory of assigned and available inspection equipment similar to appendix 8.3
- Document containing the number and function of administrative support staff

STANDARD No. 9

Program Assessment

9.1 Purpose

This standard describes the process a State program uses to assess and demonstrate its conformance with each of the program standards.

9.2 Requirement Summary

Managers conduct periodic self-assessments of its manufactured food regulatory program against the criteria established in each program standard. These self-assessments are designed to identify the strengths and weaknesses of the State program by determining the level of conformance with the program standards. Self-assessments are independently verified using an audit process.

The results of the self-assessments are used to determine areas or functions of the State program that need improvement. The results of the initial self-assessments are used to develop an improvement plan that moves the State program toward conformance with each of the program standards and establishes timeframes for making improvements. Subsequent self-assessments are used to track progress toward meeting and maintaining conformance with the program standards.

9.3 Program Elements

- a. The State program conducts an initial self-assessment of its conformity with each standard. A subsequent self-assessment is conducted every 36 months or less after completion of the initial self-assessment.
- b. When conducting a self-assessment, the State program uses worksheets comparable to those contained in the appendices of each standard.
- c. The State program uses the results of its self-assessments to develop or update an improvement plan. If the elements of the standard are not met, the improvement plan contains specific strategies and timeframes for achieving conformance and maintaining an acceptable level of performance. The improvement plan also contains reviews of the State program's progress in implementing the plan.

- d. The State program arranges for a verification audit to confirm and validate the accuracy of each self-assessment. During the verification audit, an auditor reviews the records required by each standard to determine if the self-assessment accurately reflects the State program's level of conformance with each of the standards. Verification audits are conducted within six months of completion of the self-assessment. Audits conducted by FDA for contract purposes satisfy this requirement.
- e. The State program maintains the records required by each standard and records of all self-assessments, improvement plans, and verification audits until superseded.

9.4. Outcome

The State program conforms to the program standards through well-defined evaluation activities and a process for continuous improvement.

9.5. Documentation

The State program maintains the records listed here.

- Worksheet 9 Self-worksheet assessment and improvement tracking
- Completed appendices 1, 2.1-6.1, 7, 8.1, 10
- Supporting operational documents required for each standard
- Verification audit report
- Program improvement plan

STANDARD No. 10 Laboratory Support

10.1 Purpose

This standard describes the elements of laboratory support for a manufactured food regulatory program.

10.2 Requirement Summary

The State program has access to the laboratory services needed to support program functions and documents its laboratory capabilities including agreements with external laboratories.

10.3 Program Elements

- a. The State program has access to a laboratory that is capable of analyzing a variety of samples including food, environmental, and clinical samples.
- b. The State program maintains a record of services for routine and non-routine analyses such as biological hazard determinations.
- c. The State program has a contract or written agreement with its servicing laboratories.
- d. The State program utilizes laboratories that are accredited or certified or that have a written QAP. The QAP will require:
 - Calibration, verification, and maintenance of equipment
 - Documentation of analytical results
 - Control and maintenance of documents
 - Sample accountability
 - Sample integrity and chain of custody
 - Qualifications and training of analysts
 - Audit procedures such as scheduled performance reviews of staff and instrument checks

10.4 Outcome

The State program has access to laboratory services described in this standard.

10.5 Documentation

The State program maintains records listed here.

- Appendix 10 Self-assessment worksheet
- A list of servicing laboratories used by the State program
- Contracts or written agreements with servicing laboratories

Appendix 1**Self-Assessment Worksheet**

The State program describes how equivalency is accomplished when it lacks authority to enforce the sections of the FD&C Act and the parts of the CFR listed in the following tables.

For example, the State program may comply with standard number 1 either by identifying its equivalent State authorities or by describing how equivalency is attained through alternative procedures or agreements.

a. Federal Food, Drug, and Cosmetic Act (FD&C Act)

The State law must be equivalent in effect to the sections of the FD&C Act. The language used does not have to be identical if the same outcome is achieved.

Section	Title	State equivalent or alternate provision	“✓” if full intent is met
201	Definitions (f), (k), (m), and (ff)		
301	Prohibited acts (a), (b), (c), (d), (e), (f), (k), and (v)		
303*	Penalties		
304**	Seizure		
401	Definitions and standards for food		
402	Adulterated food		
403	Misbranded food (a)-(s)		
413	New dietary ingredients		
701	Regulations and hearings		
703***	Records of interstate shipments		
704	Factory inspection		

*Penalties may vary from Federal statute.

**Seizure authority is not required under this standard. The agency, however, should have legal authority to stop adulterated and misbranded products from moving in commerce, for example, detention, stop-sale orders, and embargoes.

***This section covers records in interstate commerce. State law should include intrastate records.

b. Code of Federal Regulations (CFR)

The State regulation must be equivalent in effect to the sections listed in the CFR. The language used does not have to be identical if the same outcome is achieved. States may have more stringent regulations unless preempted.

Part	Title	State equivalent or alternate provision	“✓” if full intent is met
1	General enforcement regulations (ONLY § 1.20-1.24)		
7	Enforcement policy (ONLY § 7.1-7.13 and § 7.40-7.59)		
70	Color additives (ONLY § 70.20-70.25)		
Part	Title	State equivalent or alternate provision	“✓” if full intent is met
73	Listing of colors exempt from certification (ONLY § 73.1- § 73.615)		

74	Listing of color additives subject to certification (ONLY § 74.101-706)		
82	Listing of certified provisionally listed colors and specifications (ONLY § 82.3- § 82.706)		
100	General (ONLY § 100.155 and § 101.100)		
101	Food labeling (EXCEPT § 101.69 and § 101.108)		
102	Common or usual name for nonstandardized foods (EXCEPT § 102.19)		
104	Nutritional quality guidelines for foods		
105	Foods for special dietary use		
106	Infant formula quality control procedures (EXCEPT § 106.120)		
107	Infant formula (EXCEPT § 107.200- § 107.280)		
108	Emergency permit control (ONLY § 108.25- § 108.35)		
109	Unavoidable contaminants in food for human consumption and food-packaging materials		
110	Current good manufacturing practice in manufacturing, packing, or holding human food		
111	Current good manufacturing practice for dietary supplements		
113	Thermally processed low-acid foods packaged in hermetically sealed containers		
114	Acidified foods		
115	Shell eggs		
120	Hazard Analysis and Critical Control Point (HACCP) systems		
123	Fish and fishery products		
129	Processing and bottling of bottled drinking water		
130	Food standards: general (EXCEPT § 130.5-6 and § 130.17)		
131	Milk and cream		
133	Cheeses and related cheese products		
135	Frozen desserts		
136	Bakery products		
Part	Title	State equivalent or alternate provision	“✓” if full intent is met
137	Cereal flours and related products		
139	Macaroni and noodle products		
145	Canned fruits		

146	Canned fruit juices		
150	Fruit butters, jellies, preserves, and related products		
152	Fruit pies		
155	Canned vegetables		
156	Vegetable juices		
158	Frozen vegetables		
160	Eggs and egg products		
161	Fish and shellfish		
163	Cacao products		
164	Tree nut and peanut products		
165	Beverages		
166	Margarine		
168	Sweeteners and table syrups		
169	Food dressings and flavorings		
170	Food additives (EXCEPT § 170.6, § 170.15, and § 170.17)		
172	Food additives permitted for direct addition to food for human consumption		
173	Secondary direct food additives permitted in food for human consumption		
174	Indirect food additives: general		
175	Indirect food additives: adhesives and components of coatings		
176	Indirect food additives: paper and paperboard components		
177	Indirect food additives: polymers		
178	Indirect food additives: adjuvants, production aids, and sanitizers		
180	Food additives permitted in food or in contact with food on an interim basis pending additional study		
181	Prior-sanctioned food ingredients		
182	Substances generally recognized as safe		
184	Direct food substances affirmed as generally recognized as safe		
186	Indirect food substances affirmed as generally recognized as safe		
189	Substances prohibited from use in human food		
190	Dietary supplements		

c. State law and regulations

State laws and regulations used by the program to broaden its scope of regulatory authority are listed below.

**Appendix 2.1
Self-Assessment Worksheet**

State agency: _____ State program:

Appendix 3.1 Self-Assessment Worksheet

State agency: _____ State
program: _____

Does the State program meet the criteria contained in section 3.3 of the standard number 3?

Program Elements	Yes/No	If no, please specify why criteria are not met.
a. Risk-based inspection system		
1. Is the establishment inventory complete and accurate?		
2. Are establishments grouped based on identified risk factors?		
3. Are risk categories used to prioritize inspections, assign routine inspection frequencies, and allocate resources?		
b. Inspection protocol		
Does the program's inspection protocol require inspectors to:		
1. Review the establishment file, consumer complaints, and other relevant documents prior to inspection?		
2. Use appropriate equipment and forms?		
3. Establish jurisdiction?		
4. Select appropriate product/process (high risk products and processes)?		
5. Assess employee practices critical to the safe production and storage of food?		
6. Properly evaluate the likelihood that conditions, practices, components, and labeling could cause the product to be adulterated or misbranded?		
7. Recognize significant violative conditions or practices, and record findings consistent with program procedures?		
8. Distinguish between significant and insignificant observations, and isolated incidents and trends?		
9. Review and evaluate the appropriate operational records and procedures and apply the information obtained from this review?		

10. Collect adequate evidence and documentation in accordance with program procedures given the nature of the inspectional findings?		
11. Verify correction of deficiencies from a previous inspection?		
12. Behave professionally and demonstrate proper sanitary practices during the inspection?		

13. Use the “Fish and Fishery Products Hazards and Controls Guide” or the “Juice HACCP Hazards and Controls Guide,” to identify and evaluate the hazards associated with the product and process?		
14. Assess the firm’s implementation of sanitation monitoring for the applicable eight key areas of sanitation?		
15. Review the firm’s HACCP plan (or necessary process controls in the absence of a HACCP plan) and applicable monitoring verification and corrective action records, including those related to sanitation?		
16. Recognize deficiencies in the firm’s monitoring and sanitation procedures through in-plant observations?		
17. Identify himself/herself, present credentials, and make appropriate introductions, including explaining the purpose and scope of the inspection?		
18. Use suitable interviewing techniques?		
19. Explain findings clearly and adequately throughout the inspection?		
20. Alert the firm’s appropriate management when an immediate corrective action is necessary?		
21. Write findings accurately, clearly, and concisely on the State document?		
22. Answer questions and provide information in an appropriate manner?		
23. And, does the program have an adequate recordkeeping system and does this system contain prescribed records associated with inspections?		
c. Food recalls		
Does the recall system include:		
1. Guidance for sharing information?		
2. Procedures for prompt removal of recalled products?		
3. Procedures for recall audit checks?		
4. And, does the program have an adequate recordkeeping system and does this system contain prescribed records associated with food recalls?		
d. Consumer complaints		
1. Does the program have procedures for		

receiving, tracking, evaluating, responding to, and closing consumer complaints?		
2. Does the program have a recordkeeping system and are records associated with consumer complaints retained?		

e. Food industry inspection complaints		
1. Does the program have procedures for receiving, evaluating, responding to, and recording food industry complaints about inspections?		
2. Does the program have a recordkeeping system and are records associated with food industry inspection complaints retained?		

Name/title of auditor:

Signature: _____

Date: _____

Appendix 3.2

Risk Classification Criteria for Food Plants

Risk management is prioritizing opportunities to reduce risk and allocate food safety efforts and resources. Policymakers must consider the entire production-to-consumption chain and all of the participants (regulators, industry, researchers, health care providers, and consumers) when deciding how to best utilize resources to maximize food safety and reduce costs.

Standard number 3 focuses on one segment of the total food safety system – inspection of food plants. A key requirement of this standard is that the State program uses a science-based and risk-based method for classifying food plants into at least three risk categories with a baseline inspection frequency specified for each category. Although this standard does not prescribe a classification scheme or inspection frequency, frequencies could be established through: (1) risk-based assessment of foodborne hazards, (2) ranking the public health impacts of specific hazards, (3) measurement and valuation of the benefits of reducing risk, (4) evaluation of the effectiveness and cost of risk reduction intervention options, and (5) integration of these analyses to allocate resources.

When categorizing establishments by risk, State programs may consider several factors including: (1) the type of food and ingredients, (2) processing requirements, (3) volume of product manufactured or distributed, (4) intended consumer, and (5) compliance history of the food plant. The factors may be assigned numerical values that are tabulated to rank the food plants and prioritize inspections.

Foods with microbial hazards, especially those that require stringent temperature controls, are usually deemed high risk. Other foods such as unpasteurized juices may be classified as high risk based on epidemiologic implication in foodborne disease outbreaks. In addition to microbial hazards, chemical hazards should also be evaluated.

Complex manufacturing processes with many critical control points such as commercial sterilization, acidification, dehydration, formulation control, or mandatory HACCP systems are generally considered high risk. These operations must be properly controlled to prevent, eliminate, or reduce food safety hazards to acceptable levels. Reconditioning operations including food salvage are often

ranked as high risk because improper reconditioning could result in distribution of adulterated or misbranded products to consumers.

High volume manufacturers and distributors have the potential to expose more consumers to food safety hazards if product or process controls fail. When combined with other factors, they may be classified as high risk.

Risk Classification Criteria for Food Plants

Many classification schemes prioritize products intended for use by highly-susceptible populations¹² because these populations are more likely to experience foodborne illnesses compared to the general population.

Inspection or compliance history is commonly considered when establishing inspection frequencies. It is reasonable to expect those firms with a history of compliance to be inspected less frequently than those firms with a history of non-compliance. Some State programs factor the compliance history directly into the risk ranking while others use performance criteria to adjust the inspection frequency from a baseline established by other criteria.

Standard number 3 requires a State program to categorize food plants based on risk and to allocate resources and establish inspection frequencies based on that categorization. Standard number 3 does not prescribe how this must be done. State programs should document their classification system and inspection frequencies. Differences between agencies will exist for many reasons including variable resources, legislative mandates, localized industries and practices, and competing priorities.

The risk classification criteria listed on the next page are intended solely to assist State programs with establishing their own classification system.

¹² Highly-susceptible populations include immuno-compromised persons, preschool age children, or older adults; and persons who obtain food at a facility that provides services such as custodial care, health care, assisted living, a child or adult day care center, kidney dialysis centers, hospital or nursing home, or nutritional or socialization services (senior citizen centers).

Risk Classification Criteria for Food Plants

Risk	Type of processing
High	Canning low acid foods, acidifying foods, vacuum packaging, salvaging, smoking for preservation, curing
Medium	Cooking, cooling, holding under controlled temperatures, pasteurization
Low	Temperature control not required

Type of foods

High	Potentially hazardous foods frequently implicated in foodborne illness (sprouts, unpasteurized juices, raw shellfish, cream-filled pastries, filled macaroni products)
Medium	Potentially hazardous foods not typically implicated in foodborne illness
Low	Non-potentially hazardous foods

Volume of product manufactured/distributed

Higher distribution	High volume operations with broad
Lower	Low volume operations or operations with localized distribution

Target population

Higher	Foods consumed by susceptible populations
Lower	Foods consumed solely or primarily by the general population

Compliance history

Higher	Businesses with an inconsistent or poor history of compliance with food safety requirements
Lower	Businesses routinely in compliance with food safety requirements

**Appendix 4.1
Self-Assessment Worksheet**

State agency: _____ **State program:** _____

The results of the field inspection and desk audits are summarized below. Performance ratings that fall below 80 percent indicate a need for improvement and require corrective action. Worksheets 4.2 – 4.4 can be used to identify the specific aspects of the inspection program that need improvement.

Overall Audit Rating (based on three-year averages)

Appendix 4.2

Summary of Field Inspection Audit Findings

The summary of the performance factor ratings for all field inspection audits allows FDA and the State program to recognize trends in inspectional coverage and identify specific areas in the inspection program that may need improvement.

Worksheet 4.2 is used to calculate an overall rating for the performance period and identify single performance factors rated as “needs improvement” in multiple audits. The performance factors are described in appendix 4.5. A rating below 80 percent indicates a need for improvement and requires corrective action.

- INSTRUCTIONS:**
- (1) For each field inspection audited, record the auditor’s initials and date of audit in the box.**

 - (2) For each field inspection audited, record the rating for each performance factor listed in appendix 4.5.**
A = acceptable; NI = needs improvement.

 - (3) Record the A_t and NI_t for each performance factor.**
 A_t = horizontal total of acceptable ratings.
 NI_t = horizontal total of needs improvement ratings.

 - (4) Calculate the overall rating for the field inspection audits.**
Record the rating in the space provided in the box located at the top of worksheet 4.2.

FORMULA:

Field inspection audit performance rating =

$$[\sum A_t / (\sum A_t + \sum NI_t)] \times 100$$

NOTE: Σ *is the statistical symbol for the sum of all numbers.*

ΣA_t = vertical sum of acceptable ratings.

ΣNI_t = vertical sum of needs improvement ratings.

(5) Evaluate audit ratings for a single performance factor. Use the space at the bottom of worksheet 4.2 to identify and make notes about single performance factors rated as “needs improvement” in multiple audits.

(5) USE THIS SPACE TO IDENTIFY AND MAKE NOTES ABOUT SINGLE PERFORMANCE FACTORS RATED AS “NEEDS IMPROVEMENT” IN MULTIPLE AUDITS.

Appendix 4.3

Summary of Inspection Report Audit Findings

The summary of the performance factor ratings for all inspection report audits allows FDA and the State program to recognize trends in inspectional coverage and identify specific areas in the inspection program that may need improvement.

Worksheet 4.3 is used to calculate an overall rating for the performance period and identify single performance factors rated as “needs improvement” in multiple audits. The performance factors are described in appendix 4.6. A rating below 80 percent indicates a need for improvement and requires corrective action.

INSTRUCTIONS: (1) For each inspection report audited, record the firm identification number and date of the inspection in the box.

(2) For each inspection report audited, record the rating for each performance factor listed in appendix 4.6.

A = acceptable; NI = needs improvement.

(3) Record the A_t and NI_t for each performance factor.

A_t = horizontal total of acceptable ratings.

NI_t = horizontal total of needs improvement ratings.

(4) Calculate the overall rating for the inspection report audits.

Record the rating in the space provided in the box located at the top of worksheet 4.3.

FORMULA:

Inspection report audit performance rating =

$$\left[\frac{\sum A_t}{(\sum A_t + \sum NI_t)} \right] \times 100$$

NOTE: \sum is the statistical symbol for the sum of all numbers.

$\sum A_t$ = vertical sum of acceptable ratings.
 $\sum NI_t$ = vertical sum of needs improvement ratings.

(5) Evaluate audit ratings for a single performance factor. Use the blank page of worksheet 4.3 to identify and make notes about single performance factors rated as “needs improvement” in multiple audits.

Worksheet 4.4 Calculation of the performance rating for the sample report audits.

Appendix 4.4

Summary of Sample Report Audit Findings

The summary of the performance factor ratings for all sample report audits allows FDA and the State program to recognize trends in inspectional coverage and identify specific areas in the inspection program that may need improvement.

Worksheet 4.4 is used to calculate an overall rating for the performance period and identify single performance factors rated as “needs improvement” in multiple audits. The performance factors are described in appendix 4.7. A rating below 80 percent indicates a need for improvement and requires corrective action.

- INSTRUCTIONS:**
- (1) For each sample report audited, record the sample report identification number and date of sample collection in the box.
 - (2) For each sample report audited, record the rating for each performance factor listed in appendix 4.7.
A = acceptable; NI = needs improvement.
 - (3) Record the A_t and NI_t for each performance factor.
 A_t = horizontal total of acceptable ratings.
 NI_t = horizontal total of needs improvement ratings.
 - (4) Calculate the overall rating for the sample report audits.
Record the rating in the space provided in the box located at the top of worksheet 4.4.

FORMULA:

Sample report audit performance rating =

$$\left[\frac{\sum A_t}{(\sum A_t + \sum NI_t)} \right] \times 100$$

NOTE: \sum is the statistical symbol for the sum of all numbers.

$\sum A_t =$ vertical sum of acceptable ratings.

$\sum NI_t =$ vertical sum of needs improvement ratings.

(5) Evaluate audit ratings for a single performance factor. Use the space at the bottom of worksheet 4.4 to identify and make notes about single performance factors rated as “needs improvement” in multiple audits.

Appendix 4.5a Guidance for Completing the Contract Audit Form (FDA Form 3610)

This document provides guidance on assigning ratings during an audit for each of the performance factors listed on the Contract Audit Form. For each performance factor examples of actions and observations that would likely result in a “needs improvement” rating are provided.

I. Pre Inspection Assessment

1. **Did the inspector review the State’s establishment file for the previous inspection report and possible complaints or access other available resources in preparation for the inspection?**

I. References:

- State program’s establishment files
- FDA compliance programs referenced in the contract

II. Examples of a “needs improvement” rating

- a. The inspector does not review the State’s previous inspection report and follow-up on previously cited deficiencies.
- b. The inspector does not review a firm’s response letter to the State’s previous establishment inspection where corrective actions were promised.
- c. The inspector does not verify the firm’s normal days of operation or seasonal hours.
- d. The inspector does not follow-up on a consumer complaint contained in the State's establishment file.

2. **Did the inspector have the appropriate equipment and forms to properly conduct the inspection?**

References:

- FDA compliance programs referenced in the contract
- FDA inspection guides

EXAMPLES OF A “NEEDS IMPROVEMENT” RATING:

- a. During an inspection of a cream-filled pie manufacturer, the inspector does not have a calibrated thermometer to check the temperature of the pie.
- b. During an inspection of a cooked, ready-to-eat food processor, the inspector does not have a method to test the concentration of iodine sanitizer in the hand dip station.
- c. The inspector does not have a flashlight to examine poorly lit raw material storage areas in the plant.

II. Inspection Observations and Performance

1. Was FDA jurisdiction established?

References:

- FDA Investigations Operations Manual (IOM), subchapter 432 - Documenting Interstate Shipments
- IOM, subchapter 701 – Statutory Authority

Examples of a “needs improvement” rating

- a. The inspector fails to confirm interstate movement of a product or ingredients.
- b. The inspector fails to verify interstate shipment of food by a manufacturer that has not shipped product in interstate commerce during the past 24 months nor has the manufacturer received interstate shipments of ingredients or packaging components.

2. Did the inspector select an appropriate product for the inspection and, if necessary, make appropriate adjustments based on what the firm was producing?

References:

- FDA compliance programs referenced in the contract

Examples of a “needs improvement” rating

- a. *The inspector covers only a low-risk product while the firm is producing a high-risk product on the day of the inspection.*

- b. The inspector does not cover a small ready-to-eat sandwich operation in a large frozen dinner processing plant.
- c. While inspecting a beverage bottling plant whose primary product is institutional-sized root beer syrup, the inspector ignores a bottled water processing operation on the premises.

3. Did the inspector assess the employee practices critical to the safe production and storage of food?

Examples of a “needs improvement” rating:

- a. The inspector fails to evaluate the hygienic practices of employees working in a food processing area.
- b. The inspector is unaware of the need for employees who are processing cooked, ready-to-eat foods to wash and sanitize their hands every time they touch an unclean surface.
- c. The inspector notices that the firm has a trash bin and a reclaim bin in the same area. He/she does not, however, recognize the potential hazard. Consequently, the inspector misses an employee placing trash in the reclaim bin that contains product reintroduced into the manufacturing process.

4. Did the inspector properly evaluate the likelihood that conditions, practices, components, and/or labeling could cause the product to be adulterated or misbranded?

References:

- FDA compliance programs referenced in the contract
- NLEA inspection guide

Examples of a “needs improvement” rating:

- a. The inspector fails to recognize when a firm’s finished product labeling does not contain a sulfite declaration, even though the raw material does contain a sulfite declaration.
- b. The inspector fails to note the significance of “back hauling” raw eggs in a tanker used to carry pasteurized ice cream mix.
- c. During an inspection of a baby food manufacturer, the inspector observes a belt moving rapidly, glass jars rattling, and shards of glass on the belt. The inspector fails to determine if such observations are related to a recent increase in complaints of glass in baby food.

- d. The inspector fails to recognize the addition of an allergen during the production of a breaded product, and he/she doesn't review the product label.

5. **Did the inspector recognize significant violative conditions or practices, if present, and record findings consistent with State procedures?**

III. Examples of a “needs improvement” rating:

- a. The inspector fails to recognize that the food residues and mold growth on food contact surfaces are violations.
- b. The inspector does not recognize that employees handling cooked, ready-to-eat product with soiled hands is a deficiency.
- c. The inspector fails to notice that WD-40™, observed in the processing area, is being used to lubricate machine parts above food contact surfaces.
- d. The inspector fails to recognize that condensate dripping from a freezer onto finished product may cause cross contamination.

6. **Did the inspector demonstrate the ability to distinguish between significant versus insignificant observations and isolated incidents versus trends?**

References:

- FDA compliance programs referenced in the contract

Examples of a “needs improvement” rating:

- a. The inspector notes minor deficiencies such as chewing gum and nail polish while failing to note places where cross contamination of cooked and raw product might occur.
- b. The inspector identifies record keeping deficiencies in records that are two months old. The inspector objects to these deficiencies without appropriately considering that the firm’s weekly management review of the records has identified the deficiencies, which have not been repeated within the last seven weeks.
- c. During an inspection of a ready-to-eat salad processor, the inspector focuses primarily on filthy, non-food contact surfaces.
- d. During the inspection of a warehouse, the inspector focuses primarily on products being stored against the walls but fails to notice several pallets of rice infested with moths.

- 7. Did the inspector review and evaluate the appropriate records and procedures for this establishment's operation and effectively apply the information obtained from this review?**

IV.

EXAMPLES OF A "NEEDS IMPROVEMENT" RATING:

- a. During a review of the processing records, the inspector fails to detect that cooking times are outside the scheduled process.
 - b. The inspector fails to detect possible evidence of record falsification such as inconsistencies among different types of records, unrealistic and repetitive data, and inconsistencies in signatures.
 - c. Can teardown records are reviewed, but the inspector doesn't recognize that teardown measurements were not done at appropriate intervals.
- 8. Did the inspector collect adequate evidence and documentation in accordance with State procedures given the nature of the inspectional findings?**

Examples of a "needs improvement" rating

- a. The inspector fails to adequately document findings according to State requirements when violations are found in the firm.
 - b. The inspector fails to follow State requirements when collecting samples of processed food necessary to document violative conditions.
 - c. In an acidified food processing plant, the pH of the final product is questionable. The inspector does not, however, collect a sample of the product for pH determination.
- 9. Did the inspector verify correction of deficiencies identified during the previous State inspection?**

Examples of a "needs improvement" rating:

- a.** Although significant time and temperature abuse of coconut cream pies was identified during the previous inspection, the inspector does not determine if these deficiencies were corrected.

b. In the previous inspection, the inspector reported that a private well was not equipped with a sanitary seal. During the current inspection, the manager tells the inspector that the well was repaired, and the lab results were acceptable. The inspector reviews the microbiological lab results, but does not go to the well to verify that the sanitary seal was installed.

c. The inspector fails to follow up on deficiencies from the previous inspection for cooked, ready-to-eat product because that product was not being made at the time of the inspection. Nor does the inspector review process records for the product to determine if the firm took appropriate corrective actions.

10. Did the inspector act in a professional manner and demonstrate proper sanitary practices during the inspection?

Examples of a “needs improvement” rating:

- a. The inspector does not use the boot bath when entering in the firm's processing areas.
- b. The inspector fails to sanitize his/her thermometer prior to probing product.
- c. The inspector fails to wear protective clothing when entering an aseptic processing area.
- d. The inspector wears jewelry, which is prohibited by the firm, in the manufacturing areas.

II. A. Inspection Observation and Performance for ‘HACCP-Required’ Facilities

[Note: These four questions may be left blank if the firm is not required by regulations to have a HACCP plan.]

References:

- FDA compliance programs referenced in the contract
- Title 21 Code of Federal Regulations (21 CFR) parts 110, 120, 123, and 1240
- Fish and Fishery Products Hazards & Controls Guide
- HACCP Regulation for Fish & Fishery Products: Questions and Answers
- Juice HACCP Hazards and Controls Guide

1. Did the inspector use the “Fish and Fishery Products Hazards and Controls Guide” and the “Juice HACCP Hazards and Controls Guide”, as

appropriate, to identify and evaluate the hazards associated with the product and process?

Examples of a “needs improvement” rating:

- a. In a tuna processing plant, the inspector fails to identify histamine as a hazard inherent to the incoming raw material and fails to question its absence in the firm’s HACCP plan. (Failure to identify a hazard reasonably likely to occur.)
 - b. A firm is producing fresh, raw, refrigerated fish in cryovac packaging. The inspector is not aware that *C. botulinum* is a significant hazard.
 - c. An inspector incorrectly identifies aquaculture drugs as a significant hazard for a secondary processor of a product that it receives from the primary processor. (Identification of a hazard not reasonably likely to occur.)
 - d. The inspector fails to recognize that a batter tank in a breaded shrimp processing operation is a possible CCP. (Failure to recognize an appropriate CCP.)
- 2. Did the inspector assess the firm’s implementation of sanitation monitoring for the applicable eight key areas of sanitation?**

Examples of a “needs improvement” rating:

- a. The inspector insists on the need for the firm to perform medical check-ups for crabmeat pickers.
 - b. The inspector is unaware of which of the eight areas of sanitation are relevant to the firms operations.
 - c. The inspector fails to inquire about the firms SSOPs and monitoring practices.
- 3. Did the inspector review firm’s HACCP plan (or necessary process controls in the absence of a HACCP plan) and applicable monitoring, verification, and corrective action records, including those related to sanitation?**

Examples of a “needs improvement” rating:

- a. After conducting a brief walk through a crabmeat processor, the inspector relies on a review of the firm’s records to assess the firm’s implementation of its HACCP plan. The inspector does not return to the crab picking room to determine if picking and packing critical limits are being met or if the firm has the equipment to properly monitor the critical limits as specified in the plan.
- b. The inspection reveals that the firm is processing a product that requires a HACCP plan. The inspector cites the firm’s failure to have a HACCP plan,

but the inspector does not determine if the necessary controls were put into place without a HACCP plan.

- c. Although the inspector is told that the firm uses well water, not potable water, as its source for ice, the inspector does not verify that the firm has the water tested for coliforms to ensure its safety.
- d. The inspector does not ask the plant manager for records of pest control after learning that the service is contracted to a private company.
- e. The inspector fails to accompany the firm's sanitarian on a pre-operation inspection when there were indications that sanitary practices may be inadequate.

4. Did the inspector recognize deficiencies in the firm's monitoring and sanitation procedures through in-plant observations?

Examples of a "needs improvement" rating:

- a. The inspector fails to recognize that cumulative times and temperatures for cooling, holding, and picking of cooked crabs were substantially above such times and temperatures specified in the firm's HACCP plan.
- b. The inspector fails to recognize that a firm's finished product labeling does not contain a sulfite declaration even though an ingredient contains a sulfite declaration.
- c. The inspector fails to recognize that the presence of food residues and mold growth on processing equipment immediately prior to processing is evidence of unsanitary conditions.
- d. The inspector does not recognize that food-contact surfaces are being sanitized with a product that is not approved for use on food contact surfaces.

III. Oral and Written Communication

1. Did the inspector identify himself/herself and make appropriate introductions, which include explaining the purpose and scope of the inspection?

Examples of a "needs improvement" rating:

- a. The inspector fails to explain why he/she is at the firm.

b. The inspector enters through the back door and begins examining a storage area without notifying anyone at the firm.

2. Did the inspector use suitable interviewing techniques?

Examples of a “needs improvement” rating:

- a.** The inspector requests for information are vague; consequently, the firm provides documents that are unrelated to the inspection.
- b.** Because the inspector’s requests for information contain jargon, the employees are confused and unable to respond to his/her requests.
- c.** When the plant manager’s responses are evasive, the inspector does not ask follow-up questions to obtain the necessary information. Consequently, the answers to the questions are incomplete.

3. Did the inspector explain findings clearly and adequately throughout the inspection?

Examples of a “needs improvement” rating:

- a. The inspector does not discuss the inspection observations with the firm managers at the end of the inspection.
- b. The inspector does not discuss with the general manager a significant deficiency observed in the processing area before going to the packing area of the cannery.
- c. The inspector is vague during his discussion with the managers at the end of the inspection. Therefore, the managers are unaware of the significance of the observations and that corrective actions are needed.

4. Did the inspector alert the firm’s appropriate management when an immediate corrective action was necessary?

Examples of a “needs improvement” rating

- a. The inspector fails to alert the appropriate manager that food containing undeclared FD&C Yellow #5 is being packaged, and, if shipped, could result in a health hazard.
- b. The inspector fails to tell the appropriate manager about blood dripping from boxes of boneless beef onto raw carrots.
- c. After witnessing product being contaminated with a toxic chemical, the inspector immediately notifies the cleaning lady to clean up the toxic chemical to prevent further product contamination.

5. Did the inspector answer questions and provide information in an appropriate manner?

Examples of a “needs improvement” rating:

- a. The inspector tells the plant manager about FDA’s legal action against a competitor.
- b. The inspector gives a competitor’s product formula to a friendly plant manager.
- c. The inspector fabricates an answer to a policy question, which may lead the firm to take an inappropriate corrective action.
- d. The inspector dictates an inappropriate corrective action for a deficiency.

6. Did the inspector write their findings accurately, clearly, and concisely on the State form/document left with the firm?

References:

- FDA compliance programs referenced in the contract

Examples of a “needs improvement” rating:

- a. The inspector fails to write that the firm has a significant process deviation on the list of findings.
- b. The inspector fails to write on the list of findings that he/she observed excreta pellets in bags of rice.
- c. The list of findings shows that the “Firm did not control hazards” with

no further explanation.

DEPARTMENT OF HEALTH AND HUMAN SERVICES FOOD AND DRUG ADMINISTRATION		
CONTRACT AUDIT		
FDA AUDITOR	STATE INSPECTOR	
FIRM	CFN / FEI NUMBER	
FIRM ADDRESS		
PRODUCT(S) COVERED		
TIME IN	TIME OUT	OVERALL RATING <input type="checkbox"/> Acceptable <input type="checkbox"/> Needs Improvement
I. PREINSPECTION ASSESSMENT		
<p>1. DID THE INSPECTOR REVIEW THE STATE'S ESTABLISHMENT FILE FOR THE PREVIOUS INSPECTION REPORT AND POSSIBLE COMPLAINTS OR ACCESS OTHER AVAILABLE RESOURCES IN PREPARATION FOR THE INSPECTION?</p> <p> <input type="checkbox"/> Acceptable <input type="checkbox"/> Needs Improvement </p> <p>COMMENTS <i>(required for Needs Improvement)</i></p>		
<p>2. DID THE INSPECTOR HAVE THE APPROPRIATE EQUIPMENT AND FORMS TO PROPERLY CONDUCT THE INSPECTION?</p> <p> <input type="checkbox"/> Acceptable <input type="checkbox"/> Needs Improvement </p> <p>COMMENTS <i>(required for Needs Improvement)</i></p>		

II. INSPECTION OBSERVATIONS AND PERFORMANCE	
<p>1. WAS FDA JURISDICTION ESTABLISHED?</p> <p><input type="checkbox"/> Acceptable <input type="checkbox"/> Needs Improvement</p> <p>COMMENTS <i>(required for Needs Improvement)</i></p>	
<p>2. DID THE INSPECTOR SELECT AN APPROPRIATE PRODUCT FOR THE INSPECTION AND, IF NECESSARY, MAKE APPROPRIATE ADJUSTMENTS BASED ON WHAT THE FIRM WAS PRODUCING?</p> <p><input type="checkbox"/> Acceptable <input type="checkbox"/> Needs Improvement</p> <p>COMMENTS <i>(required for Needs Improvement)</i></p>	
<p>3. DID THE INSPECTOR ASSESS THE EMPLOYEE PRACTICES CRITICAL TO THE SAFE PRODUCTION AND STORAGE OF FOOD?</p> <p><input type="checkbox"/> Acceptable <input type="checkbox"/> Needs Improvement</p> <p>COMMENTS <i>(required for Needs Improvement)</i></p>	

4. DID THE INSPECTOR PROPERLY EVALUATE THE LIKELIHOOD THAT CONDITIONS, PRACTICES, COMPONENTS, AND/OR LABELING COULD CAUSE THE PRODUCT TO BE ADULTERATED OR MISBRANDED?

Acceptable Needs Improvement

COMMENTS *(required for Needs Improvement)*

5. DID THE INSPECTOR RECOGNIZE SIGNIFICANT VIOLATIVE CONDITIONS OR PRACTICES IF PRESENT AND RECORD FINDINGS CONSISTENT WITH STATE PROCEDURES?

Acceptable Needs Improvement

COMMENTS *(required for Needs Improvement)*

6. DID THE INSPECTOR DEMONSTRATE THE ABILITY TO DISTINGUISH BETWEEN SIGNIFICANT VERSUS INSIGNIFICANT OBSERVATIONS AND ISOLATED INCIDENTS VERSUS TRENDS?

Acceptable Needs Improvement

COMMENTS *(required for Needs Improvement)*

<p>7. DID THE INSPECTOR REVIEW AND EVALUATE THE APPROPRIATE RECORDS AND PROCEDURES FOR THIS ESTABLISHMENT'S OPERATION ANDEFFECTIVELY APPLY THE INFORMATION OBTAINED FROM THIS REVIEW?</p> <p><input type="checkbox"/> Acceptable <input type="checkbox"/> Needs Improvement</p> <p>COMMENTS <i>(required for Needs Improvement)</i></p>
<p>8. DID THE INSPECTOR COLLECT ADEQUATE EVIDENCE AND DOCUMENTATION IN ACCORDANCE WITH STATE PROCEDURES GIVEN THE NATURE OF THE INSPECTIONAL FINDINGS?</p> <p><input type="checkbox"/> Acceptable <input type="checkbox"/> Needs Improvement</p> <p>COMMENTS <i>(required for Needs Improvement)</i></p>
<p>9. DID THE INSPECTOR VERIFY CORRECTION OF DEFICIENCIES IDENTIFIED DURING THE PREVIOUS STATE INSPECTION?</p> <p><input type="checkbox"/> Acceptable <input type="checkbox"/> Needs Improvement</p> <p>COMMENTS <i>(required for Needs Improvement)</i></p>

II. INSPECTION OBSERVATIONS AND PERFORMANCE (Continued)	
<p>10. DID THE INSPECTOR ACT IN A PROFESSIONAL MANNER AND DEMONSTRATE PROPER SANITARY PRACTICES DURING THE INSPECTION?</p> <p><input type="checkbox"/> Acceptable <input type="checkbox"/> Needs Improvement</p> <p>COMMENTS (required for Needs Improvement)</p>	
II. A. INSPECTION OBSERVATIONS AND PERFORMANCE FOR 'HACCP-REGULATED' FACILITIES	
<p>Note to Auditor: These four questions apply to only firms subject to HACCP regulations. These four questions should be left blank for firms not subject to HACCP regulations.</p>	
<p>1. DID THE INSPECTOR USE THE "FISH AND FISHER PRODUCTS HAZARDS AND CONTROLS GUIDE" OR THE "JUICE HACCP HAZARDS AND CONTROLS GUIDE," AS APPROPRIATE, TO IDENTIFY AND EVALUATE THE HAZARDS ASSOCIATED WITH THE PRODUCT AND PROCESS?</p> <p><input type="checkbox"/> Acceptable <input type="checkbox"/> Needs Improvement</p> <p>COMMENTS (required for Needs Improvement)</p>	
<p>2. DID THE INSPECTOR ASSESS THE FIRM'S IMPLEMENTATION OF SANITATION MONITORING FOR THE APPLICABLE EIGHT KEY AREAS OF SANITATION?</p> <p><input type="checkbox"/> Acceptable <input type="checkbox"/> Needs Improvement</p> <p>COMMENTS (required for Needs Improvement)</p>	

3. DID THE INSPECTOR REVIEW THE FIRM'S HACCP PLAN (OR NECESSARY PROCESS CONTROLS IN THE ABSENCE OF A HACCP PLAN) AND APPLICABLE MONITORING, VERIFICATION AND CORRECTIVE ACTION RECORDS, INCLUDING THOSE RELATED TO SANITATION?

- Acceptable Needs Improvement

COMMENTS *(required for Needs Improvement)*

4. DID THE INSPECTOR RECOGNIZED EFICIENCIES IN THE FIRM'S MONITORING AND SANITATION PROCEDURES THROUGH IN-PLANT OBSERVATIONS?

- Acceptable Needs Improvement

COMMENTS *(required for Needs Improvement)*

III. ORAL AND WRITTEN COMMUNICATION

1. DID THE INSPECTOR IDENTIFY HIMSELF/HERSELF AND MAKE APPROPRIATE INTRODUCTIONS, WHICH INCLUDE EXPLAINING THE PURPOSE AND SCOPE OF THE INSPECTION?

- Acceptable Needs Improvement

COMMENTS *(required for Needs Improvement)*

<p>2. DID THE INSPECTOR USE SUITABLE INTERVIEWING TECHNIQUES?</p> <p><input type="checkbox"/> Acceptable <input type="checkbox"/> Needs Improvement</p> <p>COMMENTS (<i>required for Needs Improvement</i>)</p>
<p>3. DID THE INSPECTOR EXPLAIN FINDINGS CLEARLY AND ADEQUATELY THROUGHOUT THE INSPECTION?</p> <p><input type="checkbox"/> Acceptable <input type="checkbox"/> Needs Improvement</p> <p>COMMENTS (<i>required for Needs Improvement</i>)</p>
<p>4. DID THE INSPECTOR ALERT THE FIRM'S APPROPRIATE MANAGEMENT WHEN AN IMMEDIATE CORRECTIVE ACTION WAS NECESSARY?</p> <p><input type="checkbox"/> Acceptable <input type="checkbox"/> Needs Improvement</p> <p>COMMENTS (<i>required for Needs Improvement</i>)</p>

5. DID THE INSPECTOR ANSWER QUESTIONS AND PROVIDE INFORMATION IN AN APPROPRIATE MANNER?

Acceptable Needs Improvement

COMMENTS (required for Needs Improvement)

6. DID THE INSPECTOR WRITE THEIR FINDINGS ACCURATELY, CLEARLY AND CONCISELY ON THE STATE FORM/DOCUMENT LEFT WITH THE FIRM?

Acceptable Needs Improvement

COMMENTS (required for Needs Improvement)

NOTE: EVERY ITEM MARKED "NEEDS IMPROVEMENT" MUST BE ACCOMPANIED BY AN EXPLANATION OF WHY THE ITEM WAS JUDGED AS NEEDING IMPROVEMENT.

Overall Rating:

If three or less items are marked "needs improvement," the overall rating is "acceptable." If four or more items are marked "needs improvement," the overall rating is "needs improvement." The overall rating must be marked in the space provided in the header on the first page.

All questions must be answered "acceptable" or "needs improvement," except for section II.A. *Inspection Observations and Performance for 'HACCP-Regulated' firms*. **If the establishment is not subject to Seafood or Juice HACCP regulations, leave the scoring for these four questions blank.**

If four or more evaluated items are marked as "needs improvement," the state program manager must be notified by the appropriate FDA liaison that additional training or other performance improvement measures for then inspector being audited should be initiated. All contract inspectors who receive an overall audit score of "needs improvement" shall receive remedial training in deficient areas or as agreed upon by the FDA Project and Co-Project Officers prior to resuming contract inspection duties.

ADDITIONAL COMMENTS

Appendix 4.8
Corrective Action Plan

The corrective action for each deficiency reported during an audit should be described in the table below. Supporting documents should be referenced and maintained by the State program.

State agency: _____ State program:

Type of audit: **FIELD INSPECTION** **INSPECTION REPORT**
SAMPLE REPORT
(circle one)

Performance factor (record number from audit form)	Description of deficiency	Corrective action(s)	Date of next audit

**Appendix 5.1
Self-Assessment Worksheet**

State agency: _____ **State program:**

Does the State program meet the criteria contained in standard number 5, section 5.3?

Program Elements	Yes/ No	If no, specify why criteria are not met.
The State program uses epidemiological information from other agencies.		
1. Is the State program responsible for epidemiological investigations identified?		
2. Is there a system to coordinate agreements between the food and epidemiology programs and that clearly identifies the roles, duties, and responsibilities of each program?		
The State program has an established system to investigate reports of illness, injury, and suspected outbreaks.		
1. Are complaints alleging food-related illness, injury, or terrorism maintained in a log or database?		
2. Does the State program initiate a response to reports of illness or injury within established timeframes?		
3. Does the State program use established epidemiology procedures to conduct illness or injury investigations and collect information?		
4. Are the factors that caused the illness, injury, or incidents reported?		
The State program disseminates information to the public.		
1. Is a procedure in place that outlines criteria for releasing information to the public?		
2. Does the State program provide food safety education to the public and regulated industry?		
3. Are enforcement tools utilized to reduce and contain illness and injury?		

Program Elements	Yes/ No	If no, specify why criteria are not met.
Outbreak reports and surveillance summaries are distributed to the appropriate agencies.		
1. Does the State program maintain a current list of communication links with the appropriate agencies?		
2. Is a coordinator designated to guide investigative efforts of all agencies involved?		
3. Are investigations coordinated with the appropriate agencies?		
4. Is a procedure in place to conduct tracebacks of food implicated in an illness, injury, or outbreak, including coordination with the appropriate agencies?		
5. Are final reports of the State program's findings of foodborne illness and injury investigations maintained and shared with the appropriate agencies?		
The State program provides guidance for immediate notification of appropriate law enforcement agencies when intentional food contamination or terrorism is suspected or threatened.		
1. Is a written policy in place for handling reports or threats of intentional food contamination or terrorism?		
2. Has the State program identified a coordinator to lead investigations of suspected or threatened intentional food contamination and terrorism?		
3. Has the State program identified the appropriate agencies to be contacted and the name and phone number of designated contact persons in such agencies?		
4. Does the State program collaborate as necessary with FDA and other Federal authorities under conditions of increased threat of intentional contamination?

Appendix 5.2

Memorandum of understanding between the department of health and the department of agriculture concerning the investigation of foodborne illnesses associated with food service establishments and food plants

I. GENERAL

This Memorandum of Understanding (MOU) replaces the MOU dated _____, and effective on _____, between the Department of Health (Health) and the Department of Agriculture (Agriculture).

The purpose of this MOU is to clarify the respective responsibilities of Agriculture and Health in the surveillance for, and investigation of, foodborne illnesses, and in furtherance of such purpose, to broaden cooperative efforts between the two agencies.

Responsible Agencies

Agriculture and Health are the responsible agencies for the implementation of this MOU. Under the authority of Sections _____ of the Public Health Law and pursuant to the power granted to the State Commissioner of Health by Agriculture Law to certify and approve service food establishment permit and inspection programs of local health agencies, the State Commissioner of Health, by execution of this instrument, binds all city and county health departments and State district health offices (local health units) to its terms and conditions.

For purposes of this agreement, Health and Agriculture will be responsible for its implementation.

Jurisdiction

This MOU applies to the entire State and includes all city and county health departments.

Effective Date

This agreement will be effective _____.

Legal Authority

The _____ provides requisite authority for Agriculture and Health to enter into this MOU. Section _____ of the Public Health Law and Section _____ of the Agriculture Law also authorize this MOU.

II. RESPONSIBILITIES AND IMPLEMENTATION

Determination of Responsibility

When a food-related illness from a manufactured food product regulated by Agriculture, Health, and local health departments is reported, Health will be responsible for conducting the epidemiologic investigation. Agriculture will be responsible for investigating the food preparation areas and conducting an investigation at the food plant. Agriculture will send a copy of these reports to Health. Agriculture will also coordinate any resulting actions to remove the contaminated food from distribution. Laboratory support for investigations will be coordinated by each agency under separate existing agreements.

Implementation

Agriculture will inform its field representatives of their areas of responsibility. Health will define areas of responsibility among its local health units. Responsibilities of other State and Federal agencies also will be specified.

Health, Agriculture, and local health units will provide or sponsor joint training sessions in the interpretation and application of principles, regulations, standards, and techniques of common concern or interest.

III. MECHANISMS FOR INFORMATION EXCHANGE

Health, Agriculture, and each local health unit shall maintain rosters of regional and local Health officials and Agriculture food program supervisors and make such rosters available to each other.

If Agriculture becomes aware of actual or suspected cases of foodborne illness, it shall report such cases by telephone--without delay--to the local health unit having jurisdiction for that locality. Health and Agriculture will jointly investigate and complete final reports involving illnesses that occur at, or due to, establishments regulated by Agriculture. These reports will be forwarded to Agriculture and to Health.

Whenever one agency learns of an FDA Class I or similar recall of food or food products, it shall immediately notify the other agency of such recall. Throughout the recall process, both agencies at all levels will make a maximum effort to keep the other agency informed and cooperate in every way possible to expedite the removal of hazardous food from the marketplace.

IV. MECHANISMS FOR EMBARGO/SEIZURE OF FOOD SOURCES IMPLICATED IN EPIDEMIOLOGIC INVESTIGATIONS

Epidemiologic Investigation

Health will investigate foodborne disease outbreaks. These investigations are conducted by county, city health departments, and/or State health departments following procedures outlined in the "Environmental Health Manual." Health will notify Agriculture of all on-going investigations where a contaminated food source is the suspected cause of a disease outbreak. Agriculture will provide assistance in the investigation and may play the lead role in tracing contaminated foods back to their source by visiting retailers, wholesalers, and producers to review and obtain records that document the chain of distribution for the products. Health will analyze the findings of the epidemiologic and source investigations and make a determination as to the likelihood of an association between the illness outbreak and its cause being one or more sources. When warranted, based on the evaluation of the investigation data and analysis, the Commissioner of Health will certify to the Commissioner of Agriculture that food from the source(s) constitute(s) a danger to the health of the people of the State and that such source(s) is/are unapproved source(s) for food service establishments in the State.

Embargo, Seizure, Recall, and Public Notification

After receiving certification from the Commissioner of Health, the Commissioner of Agriculture shall direct the seizure quarantine and/or destruction of the food in question pursuant to the provisions of Section ____ of the Agriculture Law, following his or her determination that said food is adulterated within the meaning of Section ____ of the Agriculture Law and, as such, that the manufacture, processing, possession, sale, offering, or exposure for sale of such food would violate Section _____ of the Agriculture Law. Where they deem it appropriate, the Commissioners of Health and Agriculture shall direct that a recall of such adulterated food be implemented and that the public be notified of such recall. Health shall assist in cases involving such seizures, quarantines, destructions, and recalls by assuring the removal of any remaining contaminated food from food service establishments and food plants and by making available witnesses for any administrative proceedings and/or litigation associated with such actions.

Nothing herein contained shall be construed to restrict the power of the Commissioner of Health to take Summary Action under Public Health Law Section ____ to require the discontinuance of conditions or activities constituting a danger to public health when such action is deemed appropriate under the circumstances.

V. REVIEW OF AGREEMENT

This agreement between the two departments shall be submitted annually to the Governor's Office and the Division of the Budget for their review of effectiveness and to solicit their recommendations to both Agriculture and Health as to changes of policies and procedures with respect to this agreement.

Appendix 6.1
Self-Assessment Worksheet

State agency: _____ **State program:** _____

The State program will provide an overview of its compliance and enforcement program. References to sources such as laws, regulations, and manuals are acceptable.

1. Describe the compliance and enforcement program and include references to sources.

2. Describe how the State program uniformly applies enforcement strategy(ies).

3. Describe the methods (including electronic systems) used by the State program to track critical and chronic violations and violators.

4. Describe the risk-based process used to determine when a directed investigation, follow-up, or a re-inspection is needed.

5. Provide the established timeline for progressive compliance actions including but not limited to license revocation, embargoes, warning letters, and injunctions.

6. Describe how the State program delivers verbal and written policy and guidance impacting compliance decisions to non-operational and operational staff.

Name/title of auditor: _____

Signature: _____

Date: _____

Appendix 6.2

Summary of Compliance and Enforcement Activities

Worksheet 6.2 is used to record the enforcement actions recommended in the previous 12 months and to calculate the State program's rating for conformance to compliance procedures. Supporting documents should be referenced and maintained by the State program. Please indicate if an action was taken because voluntary compliance was not achieved.

It is recommended that all cases be reviewed and compiled. State programs with a volume of cases, however, may use a statistical approach and review representative cases. Use continuation sheets as necessary.

- INSTRUCTIONS:**
- (1) Record the food firm identification number and the recommended enforcement action.
 - (2) For each type of enforcement action, record the level of conformance to compliance procedures.
A = acceptable; NI = needs improvement
 - (3) Record the A_t and NI_t .
 A_t = vertical sum of acceptable ratings.
 NI_t = vertical sum of needs improvement ratings.
 - (4) Calculate the overall rating for the State program's conformance to compliance procedures. Record the rating in the space provided in the box located at the top of Worksheet 6.2.

FORMULA:

$$\text{Performance factor rating} = [A_t / (A_t + NI_t)] \times 100$$

Worksheet 6.2

Calculation of the level of conformance to compliance procedures

State agency: _____ State program: _____

Rating for conformance to compliance procedures (4):

Total Food firm identification number (1)	<i>Enter the final sums</i> subtotal + sums of Enforcement action recommended (1) <i>(2) -- on this form</i>	A _t = Compliance procedures followed? (2)	NI _t =	USE THIS SPACE TO EXPLAIN IMPROVEMENTS NEEDED TO FOLLOW COMPLIANCE PROCEDURES
Subtotal	<i>Enter the sum of the totals from all continuation sheets.</i>	A _t =	NI _t =

Appendix 8.2

I. Calculation for determining a required number of inspectors

This appendix provides a sample calculation for the number of field staff required to conduct inspections¹³ of food plants. The data in the following table will vary significantly based on local or regional conditions.

Risk category	Number in inventory	Inspection frequency	Average inspection time (include travel) ¹⁴	Reinspection frequency
High	1,000	12 months	7.2 hours	10%
Medium	2,000	18 months	5.7 hours	10%
Low	1,000	24 months	4.2 hours	10%

1. Calculate available annual inspection time per full time equivalent (FTE).

For example, the State agency determines that after allowances for annual leave, sick leave, holidays, training, administrative time, and other activities each State program FTE has 1200 hours available for conducting inspections.

2. Calculate the number of hours required to inspect establishments in each risk category.

Formula for high risk establishment inspection time:

1000 firms x 100% coverage = 1000 inspections + 10% reinspection = 1100 total inspections per year x 7.2 hours = 7920 hours

Formula for medium risk establishment inspection time:

2000 firms x 66.6% coverage = 1333 inspections + 10% reinspection = 1466 total inspections per year x 5.7 hours = 8356 hours

Formula for low risk establishment inspection time:

1000 firms x 50% coverage = 500 inspections + 10% reinspection = 550 inspection total inspections x 4.2 hours = 2320 hours

3. Calculate the number of FTE's required. Formula:

7920 hours for high risk + 8356 hours for medium risk + 2320 hours for low risk = 18596 inspection hours required / 1200 inspection hours available per FTE = **15.5 FTEs**

¹³ Includes routine surveillance, reinspections, complaint or outbreak investigations, compliance follow-up investigations, risk assessment reviews, process reviews, and other direct establishment contact time such as on-site training.-

¹⁴ Inspection times based on calculations presented in "DHHS Office of Inspector General's FDA Oversight of State Food Firm Inspections" dated June 2000.

Appendix 10
Self-Assessment Worksheet

State agency: _____ **State program:** _____

Does the State program meet the assessment criteria?

Program Elements	Yes/No	If no, please specify why criteria are not met.
Does the program have:		
a. A current list of servicing laboratories		
b. A list of analytical capabilities for each servicing laboratory		
c. A servicing laboratory to analyze samples that may contain biological hazards.		
d. Contracts or written agreements with servicing laboratories.		
e. Verification of the servicing laboratory's accreditation or certification		
The servicing laboratory's QAP contains the requirements listed here:		
a. Calibration, verification, and maintenance of equipment		
b. Documentation of analytical results		
c. Recordkeeping (worksheets, sample records)		
d. Sample accountability		
e. Sample integrity and chain of custody		
f. Qualifications of analysts (training included)		
g. Audit procedures
