## Crosswalk - Requirements For Foodborne Illness Training Programs Based on Standard 5

## Introduction:

The 2012 – 2014 Interdisciplinary Foodborne Illness Training Committee (IFITC) obtained the FSMA 205 C(1) Phases of a Food Incident Response (CIFOR/RRT/MFRPS/VNRFRPS Crosswalk) and used this Crosswalk as the response to the Charge to identify essential education content of foodborne disease outbreak training programs.

The 2014 – 2016 Interdisciplinary Foodborne Illness Training Committee (IFITC) was now charged with developing a Crosswalk that would identify areas where training programs could be compared to Standard 5 of the Voluntary National Retail Food Regulatory Program Standards. Using the CIFOR/RRT/MFRPS/VNRFRPS Crosswalk as a base, the Committee revised the Crosswalk to compare additional training programs that were identified. In addition to the training programs identified in the CIFOR/RRT/MFRPS/VNRFRPS Crosswalk, the IFITC also reviewed:

- 1. National Environmental Health Association (NEHA) course "I-FITT-RR"
- 2. National Environmental Health Association (NEHA) Epi-Ready Foodborne Illness Response Strategies, June 2006

The resulting Crosswalk now identified the content of all the training programs and indicated, using a table format, how these compared to Standard 5. This Crosswalk is called Crosswalk – Requirements for Foodborne Illness Training Programs Based on Standard 5.

The Committee also recognized that in the process of determining gaps the Crosswalk could now have an expanded purpose of (1) identifying available resources related to Foodborne Illness Training; (2) setting a content baseline for the development of Foodborne Illness Training Programs; (3) establishing some consistency for training programs as a whole. The Committee considered this a more powerful interpretation of the first Charge and as such did not include any references to best practices.

The Committee also agreed that the this document will be useful to regulators, academics and NGO's when new training programs are being considered especially as it would introduce consistency, a much needed component in Foodborne Illness Training Programs.

## Acronyms Used:

RRT: Rapid Response Team

CIFOR: Council to Improve Foodborne Outbreak Response MFRPS: Manufactured Food Regulatory Program Standards

IAFP: International Association of Food Protection

NASDA: National Association of State Departments of Agriculture – Food Emergency Response Plan Template <a href="http://www.nasda.org/File.aspx?id=4065">http://www.nasda.org/File.aspx?id=4065</a>

NEHA Epi-Ready: National Environmental Health Association

NEHA I-FITT-RR: Industry-Foodborne Illness Investigation Training and Recall Response

CDC – Center for Disease Control

VNRFPS: Voluntary National Retail Food Regulatory Program Standards – Standard 5

STANDARD 5 - Voluntary National Retail Food Regulatory Program Standards											
1. Investigative procedures.											
Standard 5	RRT	CIFOR	MFRP S	IAFP Procedures To Investigate Foodborne Illness Sixth ed.	NASDA Version 4.0. August 2011	NEHA Epi- Ready. Foodbor ne Illness Respons e Strategie s. June 2006	NEHA I-FITT-RR	CDC Foodborne Illness Outbreak Environmental Assessments			
a. The program has written operating procedures for responding to and /or	II. A. Chapter 1	3.1	5.3	Page 3-4	IV, V, VI, IX, XII	Modules 1,2,3,4, 5,6	Module 1				

conducting investigations of foodborne illness and food-related injury*. The procedures clearly identify the roles, duties and responsibilities of program staff and how the program interacts with other relevant departments and agencies. The procedures may be contained in a single source document or in multiple documents.

						2006		
a.						_ <mark>2000</mark>		
Possible contributing factors to the food-related illness, food-related injury* or intentional food contamination are identified in each onsite investigation report.	Chapters 9, 10, 11	5.2	5.3	Pages 34- 41	VI	Module 3,6	Module 3	Lesson 2
b. The program shares final reports of investigations with the state epidemiologist and reports of confirmed foodborne disease outbreaks* with CDC.	Chapter 3, 6, 13	4.2, 4.3, 4.4, 7.5, 9.1	5.5	Page 75	VI	Module 1,6 Appendi x 6	Module 4	
3. Laboratory Support Do	cumentatio	n						
a. The program has a letter of understanding, written procedures, contract or MOU acknowledging, that a laboratory(s) is willing and able to provide analytical support to the jurisdiction's food program. The documentation		4.2, 4.3, 4.4, 9.1,	5.5		VI			

describes the type of biological, chemical, radiological contaminants or other food adulterants that can be identified by the laboratory. The laboratory support available includes the ability to conduct environmental sample analysis, food sample analysis and clinical sample analysis.					
b. The program maintains a list of alternative laboratory contacts from which assistance could be sought in the event that a foodrelated emergency exceeds the capability of the primary support lab(s) listed in paragraph 3.a. This list should also identify potential sources of laboratory support such as FDA, USDA, CDC, or environmental laboratories for specific	4.2, 4.3, 4.4, 9.1	5.5	VI		

analysis that cannot be performed by the jurisdiction's primary laboratory(s).								
4. Trace-back Procedure			_					
Standard 5	RRT	CIFOR	MFRP S	IAFP Procedures To Investigate Foodborne Illness Sixth ed.	NASDA Version 4.0. August 2011	NEHA Epi- Ready. Foodbor ne Illness Respons e Strategie s. June 2006	NEHA I-FITT-RR	CDC Foodborne Illness Outbreak Environmental Assessments
a. Program management has an established procedure to address the trace-back of foods implicated in an illness, outbreak or intentional food contamination. The trace-back procedure provides for the coordinated involvement of all appropriate agencies and identifies a	Chapter 9	5.2	5.3	Forms J 1, 2 & 3	V			Lesson 7

coordinator to guide the investigation. Trace-back reports are shared with all agencies involved and with CDC.  5. Recalls								
a. Program management has an established procedure to address the recall of foods implicated in an illness, outbreak or intentional food contamination.	Chapter 12	5.2	5.3		V, IX		Module 8	
b. When the jurisdiction has the responsibility to request or monitor a product recall, written procedures equivalent to 21 CFR, Part 7 are followed.	Chapter 12	5.2			VI, IX		Module 8	
Standard 5	RRT	CIFOR	MFRP S	IAFP Procedures To Investigate Foodborne Illness Sixth ed.	NASDA Version 4.0. August 2011	NEHA Epi- Ready. Foodbor ne Illness Respons e Strategie s. June 2006	NEHA I-FITT-RR	CDC Foodborne Illness Outbreak Environmental Assessments

c. Written policies and procedures exist for verifying the effectiveness of recall actions by firms (effectiveness checks) when requested by another agency.	Chapter 12	5.2			VI			
6. Media Management	ı	ı		1		ı		
a. The program has a written policy or procedure that defines a protocol for providing information to the public regarding a foodborne illness outbreak or food safety emergency. The policy/procedure should address coordination and cooperation with other agencies involved in the investigation. A media person is designated in the protocol.	Chapter 3, 6	3.6	5.5	Page 73 and 105	V, VI, XI, XII	Module 6 Appendi x 2	Module 8	
7. Data Review and Anal	ysis
