Title:

Report - Ice Maker Equipment Cleaning and Sanitizing Committee (IMC)

Issue you would like the Conference to consider:

The Ice Maker Cleaning and Sanitizing Committee were given 3 key charges:

1. Survey regulatory agencies to determine:
 - (a) Existing regulatory authority or guidance criteria for ice maker cleaning and sanitizing procedures and frequency.
 - (b) Determine extent of critical and non-critical inspection violations.
2. Review ice maker manufacturers/owner's manuals to establish their recommended cleaning and sanitizing processing and frequencies and its rationale.
3. Report back to the 2016 biennial meeting with recommendations

Public Health Significance:

Visible ice machine mold and soil appears to be a prevalent issue in commercial ice machines and these biofilms form when cleaning and sanitizing the machine is not performed at a specific frequency to preclude such and/or when the procedure and chemicals used are insufficient to accomplish the intended purpose of preventing microbial growth.

Recommended Solution: The Conference recommends...:

1. Acknowledgement of the 2014 - 2016 Ice Maker Equipment Cleaning and Sanitizing Committee Final Report,
2. Thanking the Committee members for their work and completing their charges, and
3. Disbanding the Committee.
