1. Anonymous. 2011. Retail fruit and vegetable marketing guide. <http://ucce.ucdavis.edu/files/datastore/234-2083.pdf>
2. Fishburn, J.D. & Tang, Y & Frank, Joseph. (2012). Efficacy of various consumer-friendly produce washing technologies in reducing pathogens on fresh produce. *Food Protection Trends*. 32. 456-466.
3. Goodburn, C. and C.A. Wallace. 2013. The microbiological efficacy of decontamination methodologies for fresh produce: a review. *Food Control* 32: 418-427.
4. Jung, Yang-jin & Gao, Jingwen & Jang, Hyein & Guo, Mengqi & Matthews, Karl. (2016). Sanitizer efficacy in preventing cross-contamination during retail preparation of whole and fresh-cut cantaloupe. *Food Control*. 75. 10.1016/j.foodcont.2016.12.009.
5. Jung, Yang-jin & Jang, Hyein & Guo, Mengqi & Gao, Jingwen & Matthews, Karl. (2017). Sanitizer efficacy in preventing cross-contamination of heads of lettuce during retail crisping. *Food Microbiology*. 64. . 10.1016/j.fm.2017.01.005.
6. Keskinen, A. Lindsey & Burke, Angela & Annous, Bassam. (2009). Efficacy of chlorine, acidic electrolyzed water and aqueous chlorine dioxide solutions to decontaminate *Escherichia coli* O157:H7 from lettuce leaves. *International journal of food microbiology*. 132. 134-40. 10.1016/j.ijfoodmicro.2009.04.006.
7. Lopez-Galvez, F., A. Allende, M.V. Selma and M.I. Gil. 2009. Prevention of *Escherichia coli* cross-contamination by different commercial sanitizers during washing of fresh-cut lettuce. *Int. J. Food Microbiol.* 133: 167-171.
8. Nou, Xiangwu & Luo, Sunny. (2010). Whole-Leaf Wash Improves Chlorine Efficacy for Microbial Reduction and Prevents Pathogen Cross-Contamination during Fresh-Cut Lettuce Processing. *Journal of food science*. 75. M283-90. 10.1111/j.1750-3841.2010.01630.x.
9. Palma-Salgado, Sindy & J Pearlstein, Arne & Luo, Sunny & Park, Hee Kyung & Feng, Hao. (2014). Whole-head washing, prior to cutting, provides sanitization advantages for fresh-cut Iceberg lettuce (*Lactuca sativa* L.). *International journal of food microbiology*. 179C. 18-23. 10.1016/j.ijfoodmicro.2014.03.018.
10. Shen, C., Y. Luo, X. Nou, Q. Wang and P. Millner. 2013. Dynamic effects of free chlorine concentration, organic load, and exposure time on the inactivation of *Salmonella*, *Escherichia coli* O157:H7, and non-O157 shiga toxin-producing *E. coli*. *J. Food Prot.* 76: 386-393.
11. Starobin, A., and Foong-Cunningham, S. 2017. Fruit and vegetables washing in food retail environments. *Food Protection Trends*, 37:70-73.
12. Sully, B.D. and P.L. Williams. 1962. The analysis of solutions of per-acids and hydrogen peroxide. *Analyst* 87: 653-657.
13. Suslow, T.V. 2003. Water disinfection: a practical approach to calculating dose values for preharvest and postharvest applications. Pub. 7256. <http://anrcatalog.ucanr.edu/pdf/7256.pdf>
14. Zhang, G., L. Ma, V.H. Phelan and M.P. Doyle. 2009. Efficacy of antimicrobial agents in lettuce leaf processing water for control of *Escherichia coli* O157:H7. *J. Food Prot.* 72: 1392-1397.

### Papers reviewed that may be relevant to the charge

1. Barrera, J., Maria & Blenkinsop, R & Warriner, Keith. (2012). The effect of different processing parameters on the efficacy of commercial post-harvest washing of minimally processed spinach and shredded lettuce. *Food Control*. 25. 745–751. 10.1016/j.foodcont.2011.12.013.
2. Beuchat, L.R., and Ryu, J.H. 1997. Produce handling and processing practices. *Emerg. Inf. Dis.* 3:459-465.
3. Buchholz, A.L., G. R. Davidson, B.P. Marks, E.C.D. Todd, and E.T. Ryser. 2014. Tracking an *Escherichia coli* O157:H7-contaminated batch of leafy greens through a pilot-scale fresh-cut processing line. *J. Food Prot.* 77: 1487-1494.
4. Codex Alimentarius Commission. Code of hygienic practice for fresh fruits and vegetables.
