

Committee Progress Reports are considered DRAFT until accepted by the Executive Board

The Conference Chair, Executive Director, Council Chair, or Issue Chair may return committee reports, Issues, or attached documents requesting edits to improve clarity or understanding, or to include missing information.

Committee-submitted documents may impact the image, credibility and integrity of the Conference as an organization. With the exception of material that is copyrighted and/or has registration marks, committee generated documents submitted to the Executive Board and via the Issue process (including Issues, reports, and content documents) become the property of the Conference.

COMMITTEE NAME: Foodborne Illness Investigation Committee

DATE OF REPORT: Initial fall progress report Spring progress report Second fall progress report

COMMITTEE ASSIGNMENT: Council I Council II Council III Executive Board

REPORT SUBMITTED BY: Catherine Feeney and Robert Brown

COMMITTEE CHARGE(S):

Issue # 2020-1-015

Amend Code to Include authority to conduct foodborne illness investigations Recommended Solution: The Conference recommends...: establish a Foodborne Illness Investigation Committee to examine consumer purchase history with the following charges:

1. Determine if it would be appropriate to place language in the current Food Code to address regulatory authority for foodborne illness investigation and obtaining purchase history information. If appropriate, then;
 - a. Draft language for an amendment to the current FDA Food Code giving regulatory authorities authority for access during foodborne illness investigations
 - b. Draft language for an amendment to the Food code giving regulatory authorities access to consumer purchase history information.
 - c. Include maintaining customer data protection as confidential when managing a foodborne illness investigation.
2. Include methods to educate and collaborate with industry and regulatory authorities.
3. Report progress back at the next Biennial meeting and complete the charges by the subsequent Biennial Meeting.

COMMITTEE WORK PLAN AND TIMELINE:

- o Meet every two weeks initially, then once a week as charges near completion.
- o Survey committee members to get input
- o Form subcommittee to work on "Industry Best Practices for Providing Consumer Purchase Information for a Foodborne Illness Investigation"
- o Collaborate with SHOP (Shopper History Outbreak Partnership)

COMMITTEE ACTIVITIES:

- **Dates of committee meetings or conference calls:**

3-23-2022
 4-6-2022
 5-5-2022
 5-18-2022
 6-1-2022
 6-23-2022
 7-27-2022
 8-24-2022

Overview of committee activities:**3-23-2022****Discussed Charges 1. a. and 1. b.**

Summarized previous discussions about how investigations and inspections differ, where authority to do

investigations comes from, and where it would be placed in the Food Code if additional language is needed. Discussed options including new section in the Code or an interpretation from FDA.

Straw polls conducted regarding

- if an FDA interpretation is needed
- if we agree that consumer purchase information helps to solve outbreaks

There were 12 voting members on the call and 6 said that yes to both questions.

Action Items

Committee agreed to draft letter asking FDA for an interpretation to determine if the Food Code provides authority to conduct foodborne illness investigations.

4-6-2022

Discussed survey sent out prior to meeting to elicit feedback about the committee's opinions regarding the charges.

- There is consensus that an interpretation of the FDA Food Code is needed to determine if authority to conduct FBI investigations is implied in the Code (Charge 1. a.).
- There is consensus that a guidance document related to purchase data requests for industry is needed (charge 2).
- There was little agreement regarding codified language that permits regulatory agencies to obtain product purchase data during an investigation.

5-5-2022

Reviewed charges and summarized where committee is on each.

Charge 1. a. - *Draft language for an amendment to the current FDA Food Code giving regulatory authorities authority for access during foodborne illness investigations.* The committee almost unanimously thought that it is unclear whether or not the authority already exists for regulatory agencies to do a foodborne illness investigation. After some discussion, the committee agreed to ask FDA for an interpretation of sections in chapter 8 to determine if authority exists.

Charge 1. b. - *Draft language for an amendment to the Food Code giving regulatory authorities access to consumer purchase history information.* The respondents in favor and those opposed were fairly evenly split. All seemed to agree that this issue was not likely to be resolved during this committee.

Charge 1.c. - *Include maintaining customer data protection as confidential when managing a foodborne illness investigation.* This charge is dependent on language being included in the Food Code and the committee is not recommending that at this time due to lack of agreement.

Charge 2. - *Include methods to educate and collaborate with industry and regulatory authorities.* This charge was discussed at length. Committee agreed that an industry guidance document would be useful.

Action Items

- Committee members will reach out to the industry to get input on what guidance is needed.
- Committee members will do some searching to see if guidance is out there to build upon.
- An issue will be drafted asking FDA to interpret the Code to determine if authority already exists

5-18-2022

Drafted issues to be submitted and guidance document for industry.

Worked on two issues that were drafted for committee input regarding:

- An FDA interpretation of authority in the current Food Code to conduct FBI investigations
- Adding language to give authority to conduct investigations.

- Discussed using the Minnesota guidance document as a starting point to draft an industry best practice document.

Action Items

- Issues will be sent to committee members for review and input.
- The Minnesota guidance document will be sent to assess its usefulness as a starting point in developing an industry guidance document.

6-1-2022

Discussed issues that were drafted for committee input and edit.

- Issue one is to ask FDA for an interpretation of the Food Code to determine if authority exists to conduct foodborne illness. Bob Brown shared his screen, and some language changes were made.
- Issue two is to ask FDA to add language for regulators to have the authority to conduct foodborne illness investigations. No edits were made.

Discussed using Minnesota document to develop guidance for industry on best practices for product purchase information requests.

A subcommittee (Industry Guidance Product Purchase Workgroup) was formed. Volunteers included: Christine Fierro, Eric Puente, Kathleen O'Donnell, Kristina Stefanski, Michele DiMaggio, Cathy Feeney, and Robert Brown.

Discussed moving the full committee meeting to monthly and subcommittee to meet in between.

Action Items

- Reschedule full committee meetings to monthly (4th Wednesday of the month).
- Schedule subcommittee meetings at the time previous meeting was held (3rd Wednesday of the month).

6-23-2022

Discussion of survey results regarding issues.

Question one

Title: Amend Food Code – Include authority to conduct foodborne illness investigation into Food Code

Issue you would like the Conference to consider: We would like for the U.S. Food and Drug Administration (FDA) to add language to provide the authority for a regulatory and/or health authority to investigate reports of foodborne illness. The Conference recommends...that a letter be sent to the FDA requesting that Chapter 8 of the most current published version of the Food Code be amended to include: The REGULATORY AUTHORITY is provided access to all relevant facilities, EQUIPMENT, FOOD, personnel, and existing records when needed during a foodborne illness investigation.

Yes 10, No 4

Question two

Title: Interpretation of Food Code – Interpretation of the Food Code to determine if authority exists to investigate and obtain needed information when there is a foodborne illness outbreak.

Issue you would like the Conference to consider: We would like for the U.S. Food and Drug Administration (FDA) to provide a Food Code interpretation to inform regulatory authorities that Food Code sections including but not limited to 8-304.11(H) coupled with 8-402.11 provides sufficient authority for the regulatory authority to investigate and obtain information, including records, that are needed as part of the foodborne illness investigation from food establishments.

The Conference recommends...that a letter be sent to the FDA requesting an interpretation of the Food Code clarifying that Section 8-304.11(H) coupled with 8-402.11 and other relevant sections provide sufficient authority for a regulatory authority to conduct a foodborne illness investigation and obtain access to needed information.

Yes 13, No 1

Survey respondents: 8 voting members, 6 nonvoting members

Regulatory – , Industry – 3, Consumer Group – 1, Academia – 1, Federal Partners – 2

Action Items

- The committee agreed that based on the results of the survey, the two issues should be submitted to CFP.

7-27-2022

Review of draft guidance.

The committee spent time reviewing the draft Industry Best Practices for Providing Consumer Purchase Information for a Foodborne Illness Investigation. Numerous revisions made.

- There was a discussion about what format the product purchase data is available in. A sortable spreadsheet may not be feasible according to industry representatives. The subcommittee will look at that section of the document to make it more generic or eliminate it.
- Discussed the FMI document and it was suggested that Hillary at FMI be contacted to see if it can be shared so that our best practice document isn't duplicative or inconsistent.

Discussed a central repository for contact information to speed up communications between industry and regulators.

Action Items

- Contact FMI regarding best practice document.
- Continue work on industry best practice guidance.

8-24-2022

Activities reviewed since start of the committee.

Meeting to summarize what has been done since start of the committee in January. Reviewed issues worked on that will be submitted and the industry guidance document that is in process. The Shopper History Outbreak Partnership have drafted questions and answers and are asking for FBII committee feedback.

Action Items

- Send Q & A SHOP document for FBII feedback.
- Ask SHOP to look at this committee's best practice guidance draft.

• **Status of charges still PENDING and activities yet to be completed:**

- Finalizing "Industry Best Practices for Providing Consumer Purchase Information for a Foodborne Illness Investigation"
- Submit two issues to CFP

• **COMMITTEE REQUESTED ACTION FOR EXECUTIVE BOARD:**

- Board Action is NOT required and therefore the report can be placed on the consent calendar for Board review and acceptance.**
- Board Action is required for some provision(s) of this report and therefore a verbal report needs to be presented at the Board Meeting.**
 - Committee member roster changes: Local regulator (Diane Davis) replaced with alternate Sabrina Salinas who is also a local regulator.
 - Co-chair Adam Friedlander resigned effective 3-7-2022. Replaced by Robert Brown, Whole Foods.

ATTACHMENTS:

1. **Content Documents:**

- a) **Committee Member Roster:** See changes noted above under "requested action"
 No changes to previously approved roster "Committee Members Template" (Excel) available at: www.foodprotect.org/work/

- Committee roster to be submitted as a PDF attachment to this report.

- b) **Committee Generated Content Do** No draft content documents submitted at this time

2. **Supporting Attachments (OPTIONAL):** Not applicable

- Survey sent to get committee input and assess consensus
